Stainless Steel Sinks

Topmount, Undermount, Lay-On & Apron Front

Pages 8 - 51

20 year warranty

Topmount

This installation requires the sink to be mounted into the worktop from the top.
This installation type is suitable for all types of work-top including laminated chipboard.

Undermount

This installation requires the sink to be fitted to the worktop from the underside.
This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Apron Front

This installation requires the sink to be fitted directly on to a cabinet with its front fascia exposed.
This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Properties

Stainless Steel remains the most popular medium for kitchen sink production. It's not difficult to realise when you consider it's main attributes:

Heat Resistant
Stainless Steel is highly heat resistant, so much so that hot pans straight from the stove can rest safely on the sink - a highly useful thing when juggling the pasta.

Hygienic
A totally non-porous surface that is easy to keep clean and consequently more hygienic.

Impact Resistant
Stainless Steel is the most forgiving material for impact and is the least likely material to damage your best china or glassware whilst remaining unscathed itself.

Care and Cleaning

Bleach/Chlorides
These are found in almost all cleaning solutions and detergents and if left on the sinks for long periods can be damaging. They are water soluble, however, if you rinse away residues after each use. A weekly clean with a stainless steel cleaner is all that is needed to keep your sink looking bright and shiny.

Scratches
Like most metallic finishes, your stainless steel sink will scratch. Don't worry, these are simply usage marks that will eventually blend into the overall finish of the sink.

Water Quality
The quality of your water can affect the appearance of your sink. When water has a high iron content a brown stain can form on the surface giving the appearance of rust. Remove mineral deposits and scaling by soaking in a solution of 3 parts hot water and 1 part white vinegar, and then dry it with a soft cloth to prevent further limescale build-up.

Plastic Washing-up Bowls
It is not advisable to use a washing-up bowl as they tend to pick up grit particles and the bottom of the bowl can act like sandpaper leaving an area of concentrated tiny scratches. Instead try using a wire basket, these are available with most models.

Finishes

Linen Finish
woven effect giving an attractive lustre that is excellent at with-standing scratches.

Brushed Finish
distinctive grained finish that is ideal for matching with stainless steel appliances.

Satin Finish
even soft silk finish.

Polished Finish
shimmering reflective quality.

BREEZE

The **Breeze** has sleek modern lines with generously deep bowls all at an affordable price making it one of our most popular sinks. The 25mm radius bowls add to this sink's modernity which also match very well with the purpose designed accessories. The Breeze is constructed from thicker than normal 0.9mm gauge steel which has been treated with a sound absorbing undercoat paint on the underside increasing this sink's robustness.

XERON

These sophisticated hand finished sinks are our most geometrically shaped models and have been planned with aesthetics and practicality in mind. They are manufactured using only the highest quality 1.2mm stainless steel and have been brush polished resulting in a lustrous grained finish. There are five different configurations including double drainer models which are ideal for particularly high use kitchens. Don't forget to include some of the highly useful accessories which really add to the **Xeron's** versatility.

SILVER STAR

Now it's possible to achieve affordable prices for high fashion sinks. The ultra modern ribless drainer really adds contemporary minimalism to the room. Quality is paramount with these sinks and the **Silver Star** drainer and bowl surround is manufactured from heavy gauge 1.2mm steel, whilst the bowls are constructed from 0.8mm steel. To further add to this sinks solidity the underside has been coated with a sound deadening paint to reinforce it's robustness. All brushed to a lustrous finish.

GLACIER Covered Sink

The **Glacier** is a brand new concept for sinks, the design ethos is to close off the sink when not in use providing an overall sense of order to the whole kitchen. The glass sliding boards provide a calm uncluttered appearance when closed that can hide the items queuing up for the dishwasher. The glass covers in conjunction with the suspended colanders are also a great aid in food preparation. The futuristic design has also been extended to the wastes which incorporate steel covers concealing the strainer wastes - adding extra stylistic refinement.

OCEAN

Topmount Profile

Brushed Finish *explained - page 7*

The **Ocean** sinks are two perfect utility sinks as they boast huge bowls that will contain the largest of oven trays or pans. Ocean 1 is a vast single bowl that comes with a set of clever accessories that include a water saving washing bowl with its own waste hole and plug. Ocean 2 is a double bowl version, its accessories are available as extras.

Both sinks are very robust - built from 1.2mm stainless steel and the under-side has been treated with a sound-absorbing rubberised paint which keeps the sink quiet when in use while adding extra strength and durability.

CONTRACT
Lay-On

The Contract Lay-On fit directly on to the kitchen cabinet and are not set into a work-top, therefore maximising the 'wet' area.

There are multi-bowl and multi-drainer options to choose from. Each sink is supplied with twin tap-holes for either traditional pillar taps or deck mixer style taps. Please see pages 144-145 to see our recommended tap range.

MANHATTAN

The **Manhattan** is designed to perfectly complement any kitchen scheme, it is slightly larger than most sinks which makes it ideal for replacing your old one without the need to renew the worktop.

There are three models in the family, the versatile 1.5 bowl model, a single bowl with a capacious capacity and a double bowl model - great for multi-tasking. All are manufactured from 0.9mm high grade stainless steel, with an enhanced Satin Finish and ground edge trim.

ADELPHI

The **Adelphi** are constructed from a robust 1.0mm gauge steel . The edge profile is a single thickness thus lying virtually flush with the work surface. They are also dimensionally bigger than the usual size sinks allowing generous size washing bowls and the bigger overall dimension makes them ideal for replacing an old sink without the need to renew the worktop. They are also supplied with stylistic minimalistic strainer wastes adding to the Adelhi's modernity.

UNDERMOUNTS

The current fashion for solid surface worktops has led to the increasing number of under-mounted sink options available. We offer an unrivalled eleven ranges within our stainless steel collection providing a total choice of styles and price bands.

Undermount sink installation

Undermount sinks are installed underneath solid surface worktops such as granite, stone or wood. They cannot be fitted with laminate or melamine worktops.

Undermount Cut-outs - DXF drawings are available for download.

SALSA

The Salsa are the latest range of undermount sink from Clearwater they have contemporary rectilinear lines with 25mm radius corners and are constructed from 0.8mm steel. A sound absorbing undercoat keeps the Salsa quiet when in use whilst adding to the sinks durability.

There are three double bowl and three single bowl models to choose from - all of which can be mixed and matched to create the perfect sink solution.

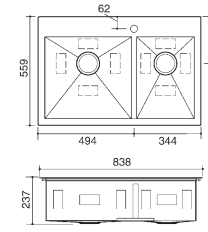
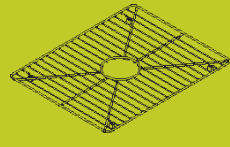
Vault Offset Double
Brushed Steel **£619**

Installation: Topmount/Undermount
Overall size: 838/559 mm
Bowl depth: 237 mm
Minimum cabinet size: 900 mm
Tap-Holes: 1
Overflow: No
Steel gauge: 1.25 mm



The **Vault** Topmount from Kohler is available in two multi-bowl designs: with either offset or twin double bowls. Both of these are also available with either full height bowl dividers or with a reduced height dividers (the new 'Smart Divide' system explained below).

A sound absorbing undercoat keeps the Vault sinks quiet when in use and adds extra strength to the very durable 1.2 mm stainless steel.



One Bottom Basin Rack
is included with each sink
Additional racks available as below:
Ref. 6641-ST £50
(for 3820 & 3838 big bowl)
Ref. 6647-ST £45
(for 3823 & 3839 small bowl)

The 'Smart Divide' sink is a new design concept for the kitchen sink with the use of a low bowl divider. Normal washing is carried out in one of the bowls or if larger items are to be washed, simply raise the water level to fill both bowls thus providing one extra large bowl. A great idea that also is an excellent water saving device.

STAGES Chef Inspired Collection

The **Stages** sinks are two highly sophisticated undermount sinks featuring high capacity bowls with wet surface work areas. Kohler developed the Stages by closely consulting with professional chefs and as a result have created the ultimate food prep-station that will prove invaluable in both commercial and domestic kitchens.

Both sinks are supplied with a set of coordinated accessories that consist of a wooden chopping board, two trays and six bowls; the board and trays are designed to sit and slide across the bowl ridge.

8 DEGREE

The distinctive bevelled edge of the **8 Degree** sink creates a subtle tone contrast with the stainless steel basin for a striking visual effect. The bevelled detail also serves a practical role as the support for the accompanying wine glass drying rack that is supplied with this sink.

The 8 Degree sinks are available in both a twin bowl and a single bowl model. A sound absorbing undercoat keeps these sinks quiet when in use and adds extra strength to the very durable 1.59 mm stainless steel.

GEOG

Accessories included

The **Geog** collection comprises of two very modern design lead sinks which can be fitted as Undermount or Topmount. The single bowl has a 'deep end' and a 'shallow end' This is an ingenious water saving solution especially when only minor washing up is required. When big pans are to be cleaned simply fill the bowl so it submerges the low draining area. Both models include deluxe strainer wastes and the versatile accessories shown.

POISE

The **Poise** Undermount bowls are a range of four models all produced from the finest 1.2mm gauge stainless steel. The bevelled edges that are unique to the Poise provide a very dynamic look. This combined with the clean straight lines and sculptured draining grooves to create the most chic range of Undermount sinks available.

Ref. 3140
Sliding Wooden Chopping Board **£99**

The unique bevelled edge allows a chopping board with a bevel that matches to sit neatly on the sink.

ICEROCK

The Kohler **Icerock** undermount sinks offer a choice of slick 45mm radius undermounts shown on these pages or a softer radius range (page 50) for more traditional settings.

Icerock sinks give you the design flexibility you need with the professional look of stainless steel. They are manufactured in 1.22mm stainless steel -the highest grade available for domestic sinks . A sound absorbing undercoat called Silentshield is also applied to the underside of the bowls; this sharply decreases noises from dishes, running water and waste disposal units. Silentshield also helps reduce condensation and maintain water temperature.

All models have overflows except 3352BW-L.

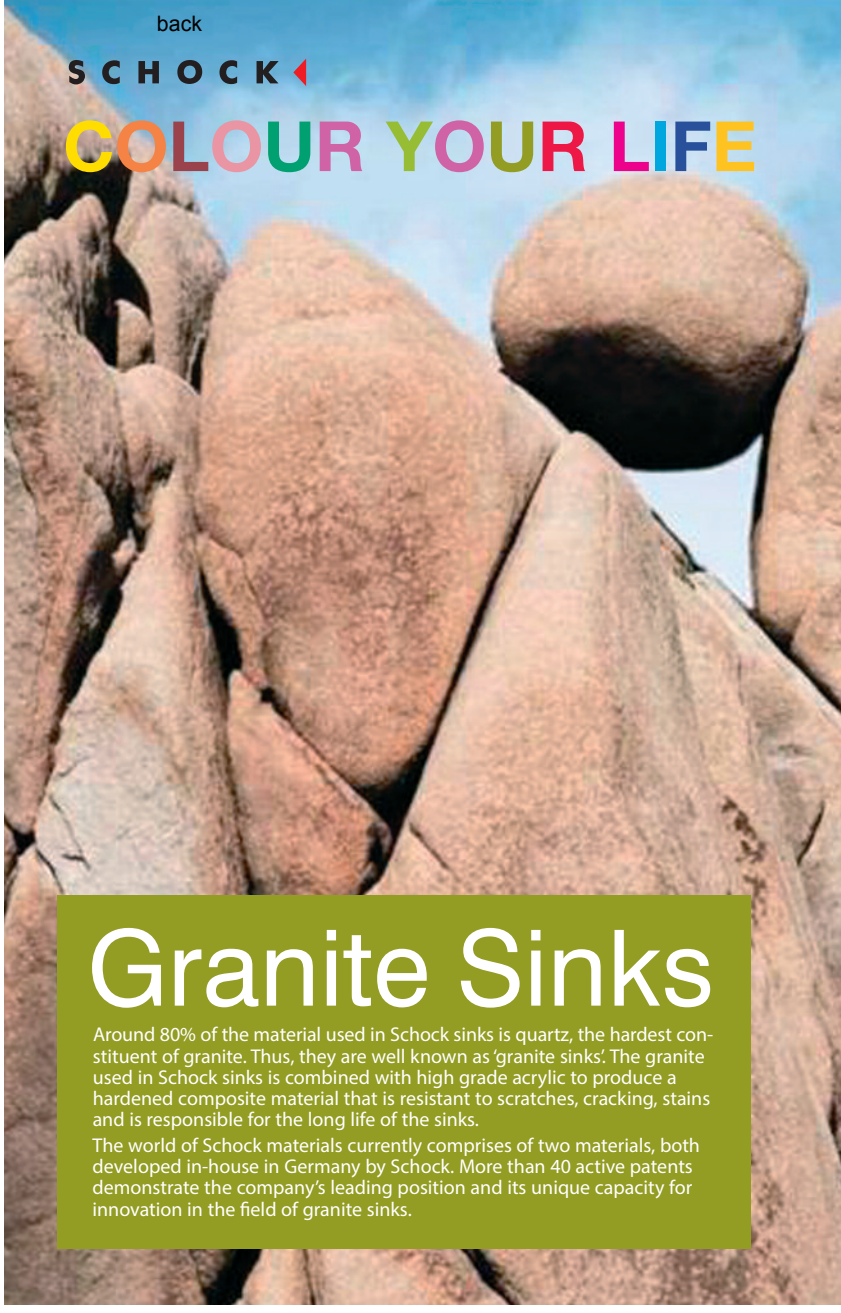
CRISTALITE+®
Pages 54-61

The new generation of Cristalite has been developed over 30 years and now features substantially improved properties. It is now even easier to clean and has a new intensity of colour.

CRISTALITE is food-safe, UV stable and all sinks are finished with Pro Hygenic. This natural antibacterial protection system, developed by Schock, inhibits 95% of bacterial growth, which makes doing kitchen chores a more hygienic and carefree experience.



Granite Sinks

Around 80% of the material used in Schock sinks is quartz, the hardest constituent of granite. Thus, they are well known as 'granite sinks'. The granite used in Schock sinks is combined with high grade acrylic to produce a hardened composite material that is resistant to scratches, cracking, stains and is responsible for the long life of the sinks.

The world of Schock materials currently comprises of two materials, both developed in-house in Germany by Schock. More than 40 active patents demonstrate the company's leading position and its unique capacity for innovation in the field of granite sinks.

CARE & CLEANING

Daily regular cleaning:
Clean using washing-up liquid and hot water.

Stubborn Stains:
Clean using Cream cleaner with a 'Scotchbrite Pad'

Mineral Deposits:
Soak in a solution of 3 parts hot water and 1 part white vinegar.

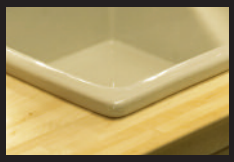
Aluminium Marks:
Remove by using 'Shiny sink' or 'Astonish' paste.

Bleach Cleaning: *(only recommended with Cristalite **not** Cristadur)*
Use diluted solution - avoid soaking for long periods as this can damage the steel/chrome waste fitting.

After Cleaning:
Always rinse with clean water to remove any cleaner residue and then dry off with a soft cloth to prevent limescale build-up.

Topmount

This installation requires the sink to be mounted into the work top from the top This installation type is suitable for all work top types including laminated chipboard



Undermount

This installation requires the sink to be fitted to the work top from the underside. This installation type is only suitable for solid surface work tops such as Granite, Marble or wood.

Easy Care Set

Cleaner (alcohol based)
Brightener
Abrasive wipe sponge

CRISTADUR®

Pages 62-68

In addition to the great attributes of CRISTALITE+ the premium CRISTADUR material has an ultra-fine structure resulting in unprecedented ease of care and featuring a dirt repellent effect (the dirt simply runs off).
Dirt that could be a breeding ground for bacteria finds it impossible to stick to the material. An added benefit of CRISTADUR is its silky-smooth surface - it's wonderfully soft to touch whilst offering maximum resistance to stains and scratches.

WATERFALL
CRISTADUR®

The **Waterfall's** flowing drainer is not only uniquely stylish but drains off water quicker than you can say Jack Robinson! This imaginative design also hasn't compromised it's functionality in that the bowls in both models are a good working size. The Waterfall will certainly be a talking point in any kitchen.

Polaris (PL)

Magma (ML)

Carbonium (CL)

Avorio (AV)

The **Horizont** have a subtly sophisticated design employing all the minimalist rules but with an added flourish, for example, the sheer drainer has a unique central draining channel and the 1.5 bowl model has had the half bowl unusually positioned on the outside of the main bowl. The crowning glory for the D150 model only is a pair of sleek black glass chopping boards that slide elegantly across the sink, when not in use the sink can be 'closed off' creating a calm and uncluttered effect.

TAPS

The Perfect Match

Our Schock taps are the perfect match for all Schock sinks; they have been clad in actual Cristalite and Cristadur material which means they are a perfect colour and material match to the sink. Also, as the material is incredibly robust there will be very little chance of deterioration with regard to scuffing, scratching or discolouration.

Scratch and chip resistant.

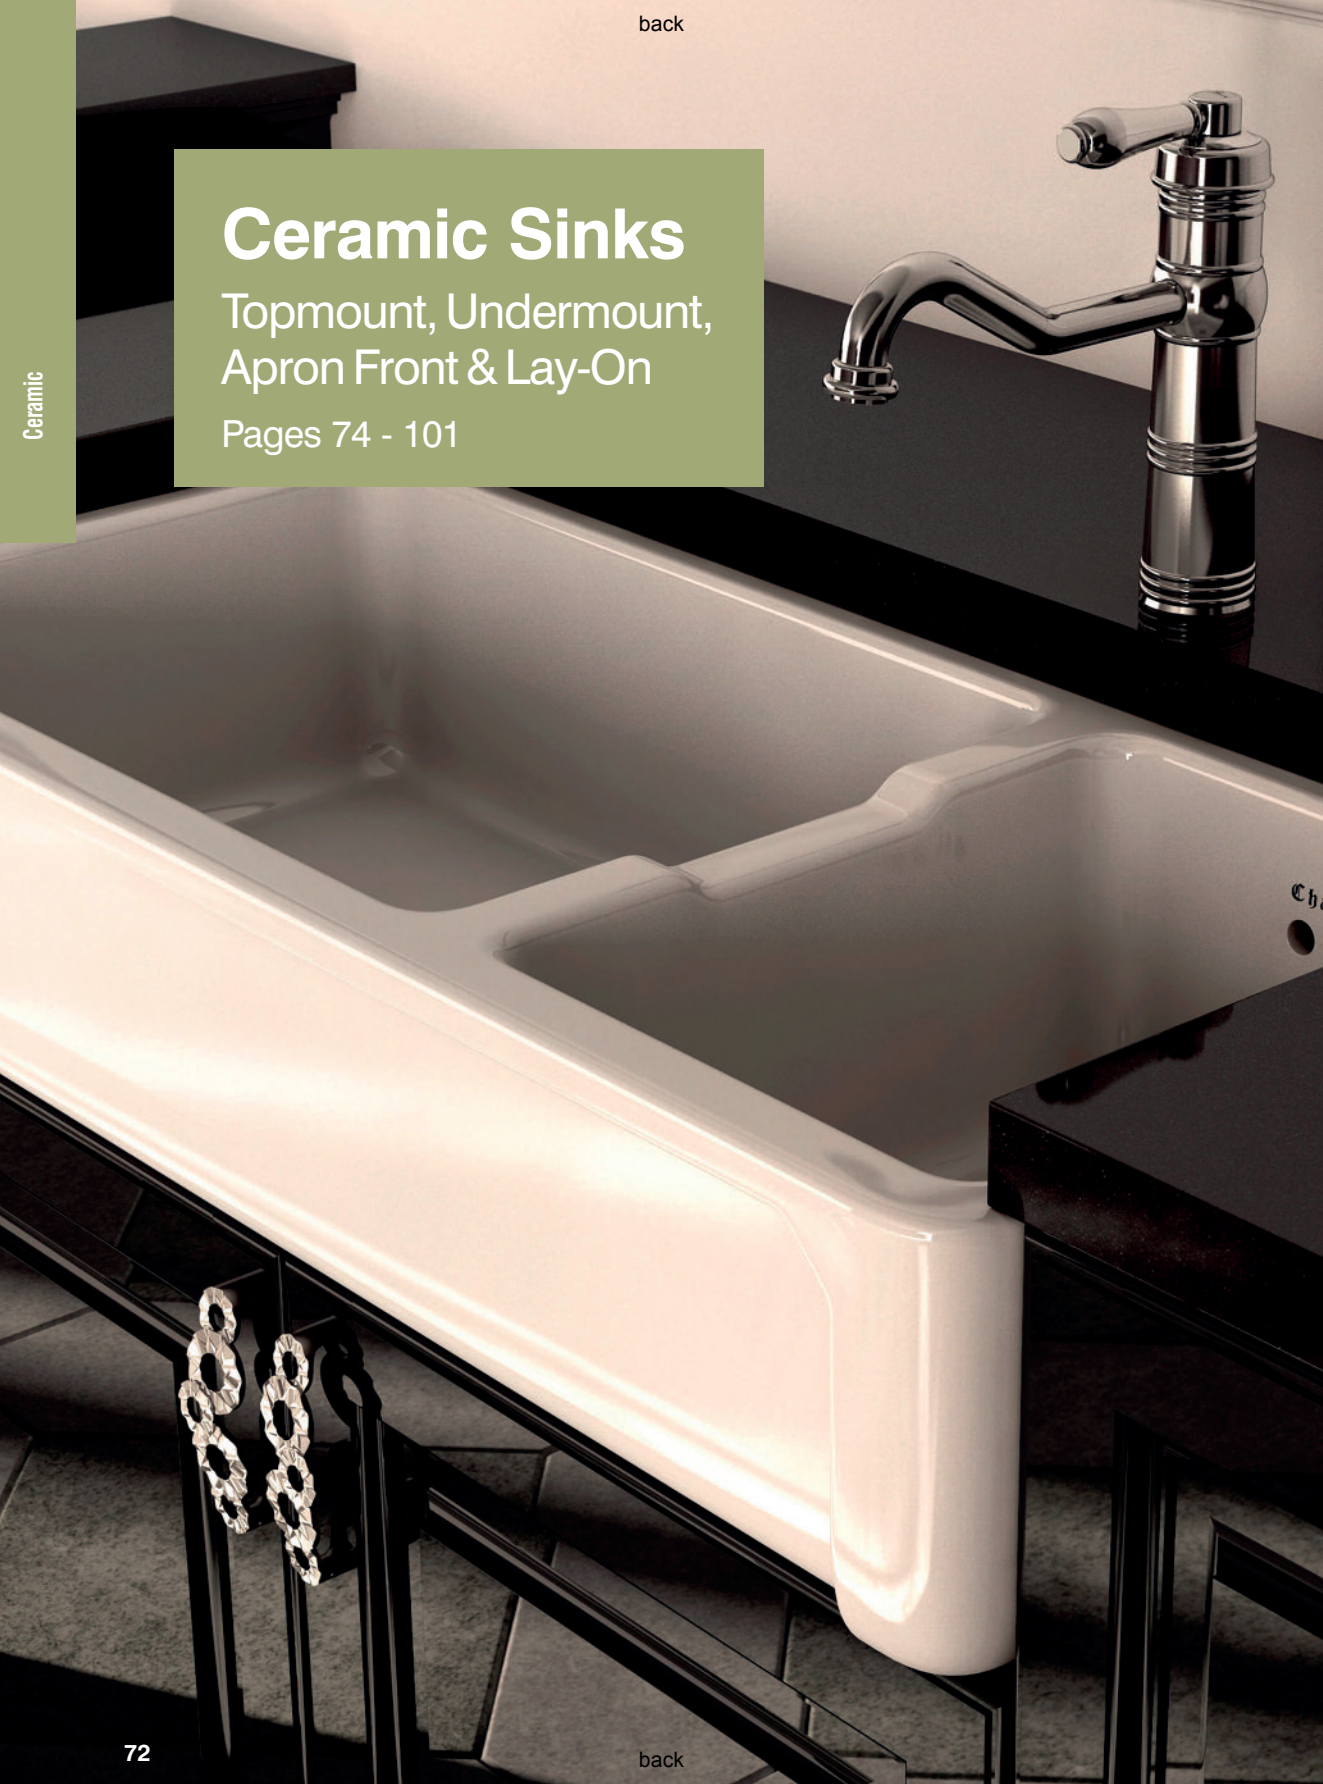
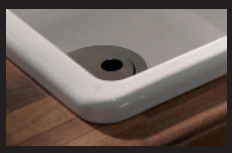
Ceramic Sinks

Topmount, Undermount, Apron Front & Lay-On

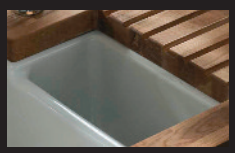
Pages 74 - 101





Topmount

This installation requires the sink to be mounted into the worktop from the top.
This installation type is suitable for all types of work-top including laminated chipboard.



Undermount

This installation requires the sink to be fitted to the worktop from the underside.
This installation type is only suitable for solid surface worktops sch as Granite, Marble or Wood.

Apron Front

This installation requires the sink to be fitted directly on to a cabinet with its front fascia exposed.
This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

20 year warranty

Properties

Heat Resistant: Ceramic is heat resistant to 1200° centigrade - this means pots from the stove and casserole dishes straight from the oven can safely rest on a ceramic sink.

Hygienic: Totally non-porous, the ultra smooth surface is the most hygienic material for sinks and the easiest to keep clean.

Chemical Resistant: Resistant to all household chemicals including neat bleach.

Extreme Hardness: Extremely resistant to impact, the surface is so hard cutlery won't scratch the glazed surface through normal use.

Care and Cleaning

To maintain the sink's good looks avoid using abrasive cleaners, as they will dull the surface. Instead, weekly clean with a dilute solution of bleach which will keep the surface shiny and hygienic. Remove mineral deposits and scaling by soaking in a solution of 3 parts hot water and 1 part white vinegar. Aluminium marks left by saucepans can be removed using 'Shiny Sink' or 'Astonish' Paste. Always finish off by rinsing your sink with clean water to remove any residue, and then dry it with a soft cloth to prevent limescale build-up.

Tap Holes

Chargeable knock-out service available on request

The dimensions of ceramic sinks may vary by +/- 2% from those given due to natural shrinkage and expansion during the manu-facturing process.

Villeroy & Boch
1748

Villeroy Boch's headquarters are based in a beautiful Benedictine Abbey in Mettlach. V&B are best known for producing beautiful ceramic objects since 1748 and responsible for many royal commissions. They are also a notable producer of the finest ceramic kitchen sinks and over the next six pages we have compiled a collection of their best.

FARMHOUSE 60

This is a timeless classic but has been given a modern twist with finer lines that allow it to grace both traditional and contemporary kitchens.

Farmhouse 60 Single bowl

"Handmade in England for over 100 years" isn't a label that can be copied or delivered easily. Nor is it one that Shaws take lightly.

England is famous for its quality manufacturing and Shaws are proud to uphold this tradition through their unique methods and their Master Craftsman, who undertake a ten year graduation.

Their professional artisans are carefully selected, exhaustively trained and continually developed to ensure that the standards never slip to ensure you receive only the very best England has to offer.

THE BOLD LOOK OF KOHLER

www.kohler.co.uk

KOHLER® products offer intrinsic quality born of tradition. Skills passed down through generations combine with innovative techniques and timeless design to establish the enduring character for which Kohler is known.
There is no substitute for the knowing hand that sculpts the rim of a washbasin or the eye that succinctly measures the thickness of enamel on red-hot cast iron as if by instinct.
This experience is bold. This experience is art.

Rustique Bowl

Chambord
FRANCE

From an entirely French viewpoint, Chambord has developed a concept of new French art deco. Their products benefit from the know-how of their factories. All factories have a story and a craft executed in a traditional and artistic way giving you the gift of outstanding quality.

By choosing Chambord you bring French style into your kitchen.

HENRI

The French Chambord **Henri** range of sinks have a flamboyant extravagance emphasised particularly by the scrolled corners and sculptured fascia panelling. This exquisite detailing ensure they have a commanding presence even in the most impressive of kitchen settings.

Cast Iron Sinks

Topmount, Undermount & Apron Front

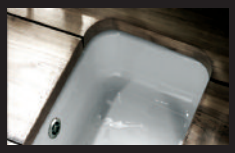
Pages 104 - 109

Molten iron being poured at the Kohler foundry

The smelters, or are they the Ghost Busters

Topmount

This installation requires the sink to be mounted into the worktop from the top.
This installation type is suitable for all types of work-top including laminated chipboard.



Undermount

This installation requires the sink to be fitted to the worktop from the underside.
This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Apron Front

This installation requires the sink to be fitted directly on to a cabinet with its front fascia exposed.
This installation type is only suitable for solid surface worktops such as Granite, Marble or Wood.

Properties

Style: The gorgeous hues of KOHLER Enamelled Cast Iron let you bring your personality into your kitchen decor. Its rich finish and long-lasting presence make a bold statement in your kitchen.

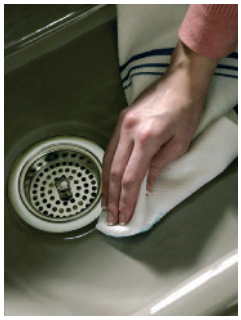
Strength: KOHLER Enamelled Cast Iron sinks are built with lasting beauty and the strength to withstand the test of time. These sinks are produced in Wisconsin USA and are crafted from at least 80% recycled material, and they come with a lifetime limited warranty.

Heritage: KOHLER Enamelled Cast Iron embodies over 130 years of craftsmanship in the foundry. The manufacturing process ensures that each piece is a genuine, handcrafted original.

Cast Iron is simply the best medium for sinks because of its extreme durability, its high gloss surface maintains a rich finish that resists chipping, staining and denting and its sheer strength enables the creation of beautiful shapes and graceful lines. The authenticity of Cast Iron will complement other traditional kitchen features such as your range cooker.

Care and Cleaning

To retain your sink's high gloss and rich lustre clean after use with a mild detergent and then wipe down using a soft dry cloth, do not use abrasive cleaners or scourers as these may dull the surface. We recommend Kohler Cast Iron cleaner is also used which helps remove stubborn marks from cutlery or aluminium pans. Most Cast Iron sinks are available with bottom basin racks which we recommend to protect the surface. Please note it is not advised to use a plastic washing-up bowl as this will damage the enamel surface by creating small scratches.



Colours

Thunder Grey

Kohler 25 Year warranty

Kohler undertake to replace your sink in the unlikely event your Cast Iron sink should ever chip or is damaged from severe heat.

A rider to this is this unique guarantee only applies to the individual who purchased the sink and does not extend to a second owner of the sink if the house is sold.

Cast Iron Sink Cleaner
Ref. 1012525
£11

Kohler Cast Iron cleaner effectively removes marks left behind by dishes and cookware therefore restoring the original shine and lustre of the Kohler Cast Iron.

Indio double offset 'Smart Divide'

The Indio offset double bowl sink offers a clean, modern look with its bevelled edge design. Its low-profile bowl divider increases the clearance between tap and divider and makes it easier to fit large items into the bowls, increases the ability to transfer large items between bowls and minimises splashing by containing water lower in the bowl.

The really useful half bowl is ideal for food preparation and comes with high quality accessories broadening its versatility.

Pictured is the **Karbon** tap *(see page 228)* that requires a 57mm mounting hole - the Indio is the only sink available with this tap-hole diameter. If you should choose a different tap the Indio is also available with normal 35mm tap-holes. Just make sure you specify which type you need when ordering.

INDIO

The **Indio** is a crisp, contemporary sink available in two forms; the single bowl version and the 'smart divide' double bowl option.

The single bowl sink has a unique side tap deck that allows easy basin access as well as creating a useful platform to store kitchen accessories. It also features an offset waste outlet which maximises storage space inside the kitchen cabinet.

Accessories included with this sink are a stainless steel bottom basin rack and a wooden chopping board that fits over the sink.

Waste Disposers

Cleaner, more convenient and environmentally responsible

Fast becoming the must-have sink appliance for today's modern kitchen.
At the touch of a button, food waste is dealt with hygienically and instantly - rather than leaving it in the bin to encourage smells, bacteria and insects.

Waste disposers don't just offer practical convenience, they provide an environmentally sound answer to the growing problem of food waste.

www.insinkerator.co.uk

Ref. ISE45+
£150

This entry level is suitable for lighter use in small households.

Ref. ISE45AS+
£191

Waste disposer ISE45 plus air switch.

Specifications

- Continuous feed operation
- Standard grind chamber (980ml)
- 2 year parts and labour guarantee
- 0.45hp

iGlass

Splashback

Glass splashbacks are innovative, eye catching, hygienic, easy to install and are available in six exciting colours which are guaranteed not to fade. Glass is a very practical material for the kitchen; it is non-porous so cannot harbour germs and is easy to keep clean; the end result is a smooth, glossy, seamless finish.

Inject light and contemporary design into your kitchen for a real wow-factor.

Easy to install with peel and stick technology. Made from 6mm annealed, safety-backed glass.

Useful Information

- No need for a specialist fitter - easy to fit with high quality foam adhesive backing.
- They can be cut on site with a glass cutter.
- Totally opaque therefore the background is not visible.
- The hob splashbacks have to be installed at least 50mm away from the hob with a 3mm expansion gap which can be filled with silicone.

Splashbacks - All colours

LED LIGHTING

sensio
furniture lighting solutions

www.sensio.co.uk

Sensio has become the market leader in kitchen lighting, and are always looking to the future. They are proud of their heritage and even prouder of the fact that they will continue to design and develop the most ground-breaking lighting solutions for you. Innovation has always been at the heart of what they do, they don't just follow the trends - they help set them. From stunningly practical task and convenience lighting to state of the art mood lighting that truly brings a design to life.

We believe the future is LED which is why the product portfolio is exclusively LED – in the following pages we hope you'll see what we mean…

Sensio cable connect system

With the cable connect system there is no need for a fitter, as the cable does not need to be pulled through or re-routed from behind the cabinet.

The LED lamps in these fittings can be replaced by anyone. This system is available with our HD LED under cabinet spot light range of fittings. Each fitting has 2.5m of cable, the lamp then has a 35mm cable (see image above) which simply clicks in/out.

Ordering LED Lighting

1 **bcation**
Lighting is available for various locations in the kitchen (see diagram).
Choose your fitting and note the code.

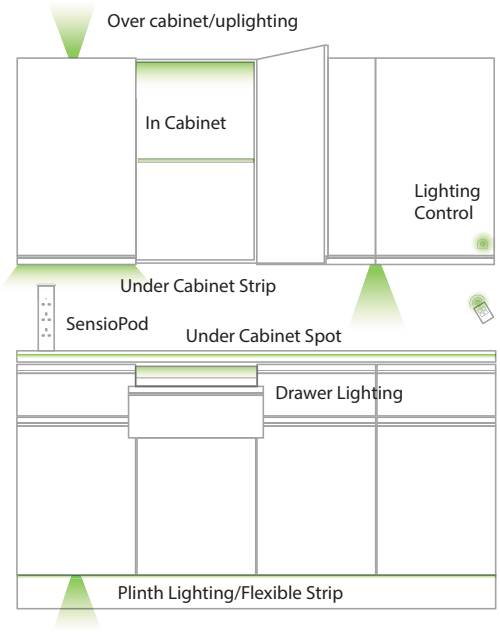
2 **Colour Temperature**
Choose from Cool White or Warm White LED.

3 **Quantity**
How many lights do you have?

4 **Wattage**
Calculate the total wattage of your fittings.
E.G 6 fittings at 1.65W each = 9.9W.

5 **Driver**
Select the correct driver by matching the colour coded logo on the light to the colour code of the driver.

6 **Driver Size**
Choose an adequate driver to run your fittings.
Ensure you consider both the wattage and number of ports on the driver.



Connecting by Colour

To simplify the process of selecting the appropriate driver for your lighting requirements, Sensio has introduced an easy-to-use colour coding system.

The cable on the fitting, the distributor block on the driver and the outer packaging of each product all carry a colour-coded label.

All components are colour coded.

The packaging is colour coded.

The cable on the fitting is colour coded.

The wattage of the driver is indicated on the block to avoid the wattage allowance of the driver being exceeded.

Selecting the right driver for your Lights:

1 Refer to the colour coding.

2 Divide the wattage of the driver by the wattage of a single light, this will tell you how many lights can be run from one driver.

3 Ensure you consider the ports on the driver, some drivers have a limited number of ports, eg a 15W driver is limited to 6 ports.

- SE40625 6W with 4 Port Distributor **£15**
- SE40525 15W with 6 Port Distributor **£21**
- SE40526 30W with 12 Port Distributor **£36**
- SE40553 6W with 4 Port Distributor **£17**
- SE40555 15W with 6 Port Distributor **£21**
- SE40556 30W with 12 Port Distributor **£34**

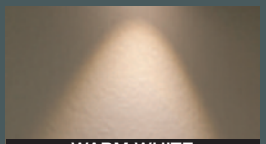
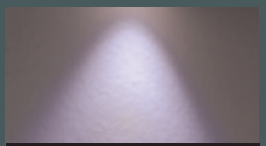
2 year warranty





Light Colour

Warm White is better suited to the more traditional kitchen designs, wood or painted doors and wood worktops. It is the closest in colour to halogen, which a lot of consumers are used to and comfortable with. Warm White HD LED fittings can be used as an energy efficient direct replacement for halogen lighting.

Cool White is best used in contemporary kitchens for high gloss doors, granite worktops etc. It is still brighter than Warm White so that should be taken into consideration for certain specifications. Use of Cool White for convenience lighting is preferable as it is brighter.

Warm White is more aesthetically pleasing with most timber/traditional types of kitchens and worktops. Another element that is making an impact is the current rejuvenation of painted kitchen doors, we have found that irrespective of what colour the actual door is, the Warm White light augments the painted effect, whereas Cool White can quite often either bleach the colour or bring out a grey undertone which detracts from the actual colour.

The importance of Lighting

If there's one space in the home where getting the lighting right is absolutely critical, it's the kitchen. Here's just one example of how LED lighting can make the ordinary, look simply extraordinary.

Developing a Lighting Scheme

1 **Flexible Strip Lighting** is an extremely versatile product which can be used in various locations in the kitchen or bathroom to create stunning mood/accent lighting.

In the kitchen view opposite, the cool white flexible strip is used above the cabinets and tall housing as well as along the plinth and under the worktop on this handleless kitchen.

2 **Under Cabinet Spot Lighting**

3 **Under Cabinet Strip Lighting**
Pefectly positioned under cabinet lighting is used to ensure the kitchen is an efficient working space for everyday tasks such as food preperation.

4 **In Cabinet Lighting**
Use LED spot lighting in glass cabinets to create ambient mood lighting. Or use in standard cabinets with a door sensor.

5 **SensioPod**
A neat and effective solution suitable for the kitchen or home office.

Spot Lighting

Quadra PLUS LED Light

Mount under cabinets or inside cabinets.

Ref. 01.1000.0610 2.4W - Cool White LED **£17**
Ref. 01.1000.0620 2.4W - Warm White LED **£17**

The lens on this fitting has a triphosphur coating, creating an even spread of light.

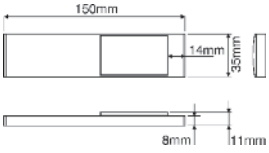
The cool white LED, aluminium finish and sleek design of this fitting makes it ideal for contemporary kitchens.

The fittings daisy chain together (or can be connected to the driver individually) meaning a maximum of 6 fittings can be run from 1 x 15W driver.

Daisy chain non sensor fittings into one sensor fitting for synchronised switching of all lighting in the run via the integrated touch sensor.

The touch sensor illuminates blue when the light is off for visibility.

Slimline, discreet fitting.



Driver *see page 126*

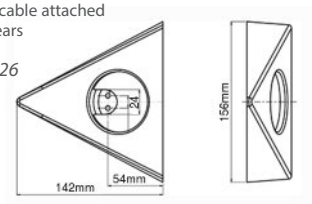
Bermuda HD LED Triangle Light

Mount under cabinets for superb task lighting. Use a warm white LED to replicate the halogen triangle light.

Ref. SE9001HDSSCW 1.65W - Cool White LED **£18**
Ref. SE9001HDSSWW 1.65W - Warm White LED **£18**

High definition LED
Stainless Steel finish
Cool white & warm white LED available
Each fitting has a 2.5m cable attached
Long lifespan of 12.5 years

Driver *see page 126*



Hype HD LED Recess/Surface Light

This product can be mounted under kitchen cabinets and used as task lighting. Or use in glass fronted cabinets for mood lighting.

Ref. SE9005HDSSCW 1.65W - Cool White LED **£16**
Ref. SE9005HDSSWW 1.65W - Warm White LED **£16**

High definition LED
Stainless Steel finish
Cool white & warm white LED available
Each fitting has a 2.5m cable attached

HD LED Click Slideline System with Sensor

Lamp codes:

Ref. SE9055HDRWW 1.65W
Round Lamp - Warm White LED **£22**

Ref. SE9055HDSCW 2W
Square Lamp - Cool White LED **£22**

Track codes:

Ref. SE9056HD 600mm **£20**
Ref. SE9057HD 900mm **£25**
Ref. SE9058HD 1200mm **£27**

Driver *see page 126*

Very simple and effective lighting solution – fit the track, click on the lamps & slide the lamps along to wherever task lighting is required when working in the kitchen.

High definition LED lamps for a more intense light output.

Choose a solution to suit you; choose either round or square lamps in either cool white or warm white LED.

The track can be cut to length if required.

The perfect solution to show clients the effect of both cool white and warm white LED.

Integrated infra-red sensor. To maintain hygiene levels the lights can be switched on/off by simply swiping your hand past the sensor. (Sensor has a 5cm detection range)

Energy saving - low wattage LED lamps.

Extremely simple to exchange lamps should it be required.

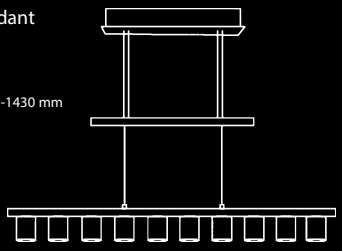
Width: 905 mm
Height: Adjustable 790-1430 mm
Weight: 4.333 kg

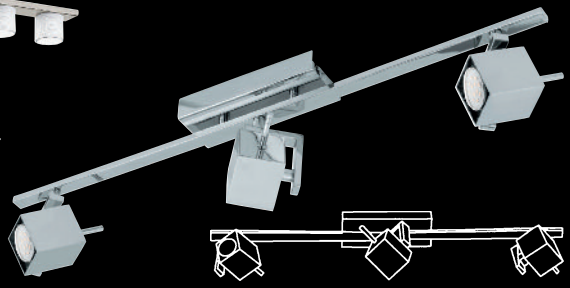


MANAO

A stylish ceiling mounted track.

Manao LED Spot
Steel, Aluminium, Chrome
Ref. 93156 £232

Width: 110 mm
Depth: 110 mm
Weight: 0.612 kg



KITCHEN TAPS

Pages 136 - 235

We are particularly proud of our extensive collection of taps. They range from the classic to the modern and minimalist styles. There are many installation types to choose from: the standard monobloc, the bridge or three-hole mixers or even the increasingly popular wall-mounted style.

We only deal with the leading high quality manufacturers. So whatever your tap choice may be you will be assured of the highest quality product that will give you years of faithful service.

If a problem with your tap should occur we offer a full replacement parts back up.

About Water Pressure

Gravity - it is very important that before you purchase your tap you establish the water pressure in your home. If you have a traditional hot water cylinder the pressure will be determined by gravity only. Measure the height from the bottom of your cold storage tank (usually located in the loft) to your kitchen tap - the longer the drop the more pressure you will have - see table below.

0.1 Bar = 3 foot head of pressure
0.2 Bar = 6 foot head of pressure
0.5 Bar = 15 foot head of pressure
1.0 Bar = 30 foot head of pressure etc

Combination Boilers - usually provide a good level of pressure - this is usually between 1.5 to 2 bar with an average mains pressure supply coming in to your house.

Look out for our minimum bar guides shown with each tap, use this in conjunction with this table to assist in choosing the right tap for your home.

clearwater®

Clearwater is the 'own brand' name of Sterling, all our taps are manufactured exclusively for us in Italy and Asia. We have been particularly careful to select taps most suited for use in the UK which means most models can operate in low water pressure systems. Clearwater taps are at the budget end of the price scale and provide excellent value for money. This is achieved by not having a high profile brand surcharge which is often added to cover high marketing costs. Quality has remained paramount and this has been achieved by sourcing from the most respected manufacturers. Indeed, over half of our taps are produced in Italy by Gessi, one of Europe's leading tap manufacturers. Most of our taps are backed up by European quality certificates including the well known WRAS qualification. Clearwater taps are fully guaranteed for five years.

Modern Single Lever

The Single Lever models are nearly exclusively used in the rest of Europe and are now increasingly used in British kitchens. The single valve technology means hot and cold can be adjusted with a backward or forward movement of the lever.

Sonatina single lever monobloc with swivel spout.

Rectilinear elegance.

Ref. CW1020CP Chrome **£206**

abode www.abode.eu

STYLE QUALITY DESIGN & INNOVATION

....are the watch words for Abode who are responsible for some of the most iconic taps available today. If you are a fan of Grand Designs you will have already have seen some of their products standing proud in the most glamourous of settings. Abode are based in Yorkshire where they design taps for production in high quality factories in Europe and Asia. Their principle aim has been to perfect a tap for the British market - this means many of their models work easily with our typically low pressure gravity systems.

Innovation has always been a driving force for Abode who have been the inventors of the quite brilliant 'Swich' filtered water system that has made it possible to convert your old tap into a filtered water tap! Another great innovation has been a new style of valve that can be operated by flipper controls, thus making it possible to radically change overall tap designs that you see today. You will also find their classical designs in our Traditional tap section.

ESTIMO

A stylish tap with a strong forward thrusting appearance.

Estimo twin lever monobloc with swivel spout

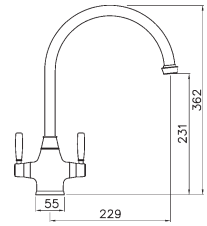
BROMPTON

The **Bromptons** will appeal to those of you who aspire to state of the art modern taps but with a traditional twist. This striking tap family offer a refreshing change from today's highly marketed stark minimalism and will grace the bowls of both modern and traditional kitchen settings.

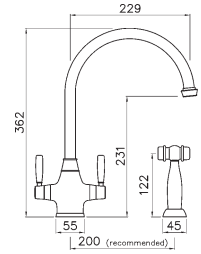
There are three designs to select from each offering a highly versatile retractable handshower.



Brompton Dual Lever Monobloc

Ref. AT3012 Chrome **£279**
Ref. AT3014 Pewter **£309**

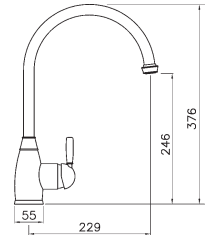
Min. 0.4 bar pressure required
360˚ swivel spout
Mounting hole size Ø 35mm



Brompton Dual Lever Monobloc with integrated Handspray

Ref. AT3013 Chrome **£399**
Ref. AT3015 Pewter **£439**

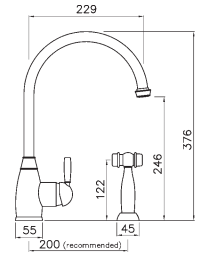
Min. 1.25 bar pressure required
360˚ swivel spout
Mounting hole size Ø 35mm
Pull-out hose length 600-700mm



Brompton Single Lever Monobloc

Ref. AT3016 Chrome **£279**
Ref. AT3018 Pewter **£309**

Min. 0.5 bar pressure required
360˚ swivel spout
Mounting hole size Ø 35mm



Brompton Single Lever Monobloc with integrated Handspray

Ref. AT3017 Chrome **£399**
Ref. AT3019 Pewter **£439**

Min. 1.25 bar pressure required
360˚ swivel spout
Mounting hole size Ø 35mm
Pull-out hose length 600-700mm

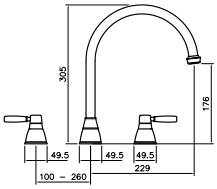
The Handspray

The Handspray supplied with models AT3013/15 & AT3017/19 is integrated - this means the water temperature and flow rate are regulated by adjusting the tap controls and then diverted by pressing the trigger on the spray, once this trigger is released the water flow will revert back to the tap. If fitted within 200 mm of the tap there is a useful pull-out hose length available of approximately 700 mm.

Brompton 3 Part Mixer

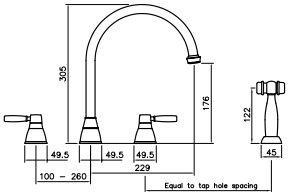
Ref. AT3044 Chrome **£339**
Ref. AT3045 Pewter **£389**

Min. 0.4 bar pressure required
360˚ swivel spout
Mounting hole size Ø 3 x 25mm
Tap-hole centres 100-260mm



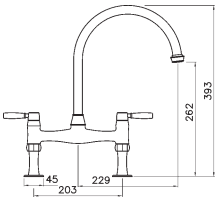
Brompton 3 Part Mixer with independent Hendon Handspray

Ref. AT3048 Chrome **£465**
Ref. AT3049 Pewter **£525**



The Handspray

The Handspray supplied with models AT3021 & AT3023 is designed to be plumbed independently from the tap. This means it will operate by simply pressing the trigger without having to turn on the tap. It can only have a single water supply - either hot or cold can be applied.



Brompton Dual Lever Bridge Mixer

Ref. AT3020 Chrome **£349**
Ref. AT3022 Pewter **£379**

Min. 0.4 bar pressure required
360˚ swivel spout

Ref. AT3001 Chrome **£409**
Ref. AT3003 Pewter **£449**

Min. 1.25 bar pressure required
360˚ swivel spout
Mounting hole size Ø 35mm
Pull-out hose length 600-700mm

The Handspray

The Handspray supplied with models AT3001/3 & AT3005/7 is integrated - this means the water temperature and flow rate are regulated by adjusting the tap controls and then diverted by pressing the trigger on the spray, once this trigger is released the water flow will revert back to the tap. If fitted within 200 mm of the tap there is a useful pull-out hose length available of approximately 700 mm.

Astbury 3 Part Mixer

Ref. AT3046 Chrome **£349**
Ref. AT3047 Pewter **£399**

Min. 0.4 bar pressure required
360˚ swivel spout
Mounting hole size Ø 3 x 25mm

BAYENNE

This range of taps echoes the flamboyant and distinctive styles of the Baroque period.

The exuberant styling is complemented by modern engineering with the integration of the latest technology in valve design ensuring smooth and effortless operation, time after time. These taps all swivel smoothly at the uppermost junction ensuring practical flexibility at the same time as dramatic form.

There are three body shapes available, two monobloc taps and one bridge version, all versions have the option of choosing the ever useful pull-out handspray that greatly widens the versatility of these beautiful taps.

The Handspray

The Handspray supplied with models AT3034 & AT3035 is designed to be plumbed independently from the tap. This means it will operate by simply pressing the trigger without having to turn on the tap. It can only have a single water supply - either hot or cold can be applied.

GESSI

www.gessi.it

Set in the beautiful lake district of Italy lies the state of the art Gessi design and manufacturing plant. Gessi have become one of the biggest manufacturers in Italy and this success is largely attributed to their sublime ultra-modern cutting edge designs, combined with an uncompromising vision to produce only the best quality taps.

The Gessi brand is now found worldwide in the finest of hotels and high class developments as well as today's modern domestic kitchens.

I-SPA

The **I-Spa** combines avant garde styling with high practicality. This great design incorporates a joy to use joy-stick that effortlessly controls the temperature and flow, and the unique blade spout swivels silkily from the top of the tap. The most notable feature is the coloured inserts in black or white - these smart decorations are ideal for coordinating with the hob, kettle etc.

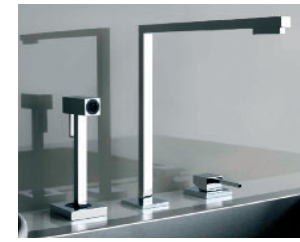
MINIMO

The **Minimo** are the latest generation of rectilinear taps from Gessi. The geometric aesthetic that is so popular has been designed with a much more slender elongated shape to add femininity to these architectural taps.



Minimo 3 hole mixer with swivel spout and pull-out spray and remote dual control

Ref. 17040031 Chrome **£717**

Pull-out hose length 50cm
170° swivel spout
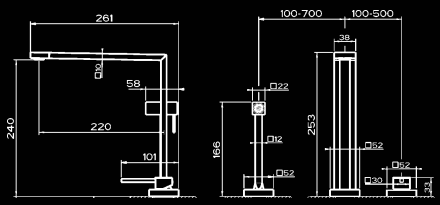
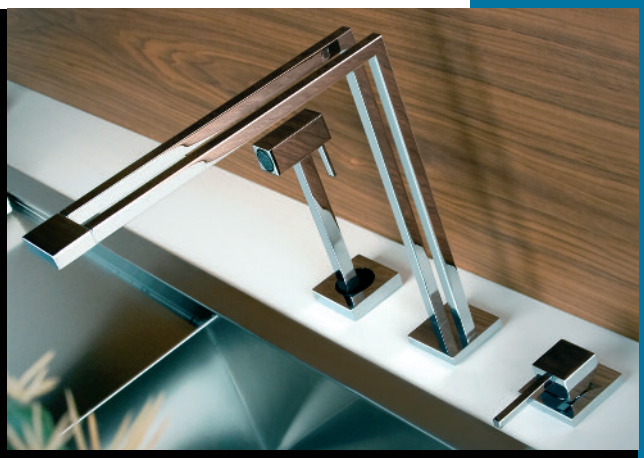
Mounting hole sizes ∅ 33.5mm





DUPLICE

The **Duplice's** unique design feature is it's individual hot and cold water channels; this distinctive design is enhanced by fine rectilinear styling. There are three models; a three hole mixer which is ideally suited for a worktop installation (this mixer has an individual dual function control), a pull-out hand-spray and the very distinctive feature swivel spout. There are two monobloc versions which share the same delicate cubist aesthetics that are suitable for sink and worktop installations. One has a standard side lever, the other is operated by a 'joystick' for precise and easy control.

Duplice single lever monobloc mixer with swivel spout

LOGIC

The **Logic** has a triple height position spout that can be set for the task in hand. The highest for filling tall vessels, the middle setting for everyday washing-up and, when the sink is not in use, it can be set to its lowest unobtrusive position. It is available in two models, one that is a standard tap and a second one that incorporates a pull-out rinse.

Logic 2 hole mixer with triple height position swivel spout and remote dual control

Ref. 17051031 Chrome **£186**

Min 0.5 bar pressure required
360° swivel spout
Mounting hole size Ø 35mm

JUST

Just taps use the latest tap technology, incorporating LED lighting around the spout aerator. These lights are powered by a miniature turbine which is driven by the tap's own water flow, so there is no need for an outside power source. Aesthetics are always primary in Gessi's philosophy and they have used a unique tapering design that really adds presence to the kitchen.

Mounting hole size Ø 35mm

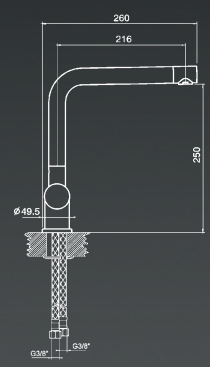
OXYGEN

The **Oxygen** family of taps is wide and varied, on this page we have featured three 'L' spout models with a choice of standard and pull-out spout options and not forgetting the separate pull-out rinse model which is becoming increasingly popular since taps are now often fitted on the work top rather than the sink.



Oxygen single lever monobloc mixer with swivel spout

Mounting hole size Ø 35mm
WRAS Approved

Gessi's original **Oxygen** range has been given a semi-professional makeover with it's hi-Tech additions. The notable feature is the spring spout that allows the spout to be directed 360° - a great facility for rinsing the vegetables or even rinsing out the sink. The exception to this is the 910 model, which instead, has a solid spout with a knurled grip to withdraw the pull-out rinse. The flagship of this range is the 941 which is the chef's choice as it is a true multi-task tap with its directional dual spray hose and separate swivel spout. All models will be a strong presence in the kitchen.

Mounting hole size Ø 35mm

INCLINE

The **Incline** has been given a purposeful intent with it's forward tilt and crisp geometric lines that will really make a statement even in the most slickest of kitchens. One of it's many design benefits is that the spout swivels from the top junction thus making it's movement silky smooth and a joy to use.

OCEAN

The **Ocean** is a modern tubular design and has been given a futuristic sloping profile that extends it's reach into the sink. There are two models available both with full swivel spouts and one with a versatile pull-out rinse.

Ocean monobloc mixer with single lever control and swivel spout

PERRIN & ROWE
MAYFAIR LONDON

www.perrinandrowe.co.uk

Established in 1978, Perrin & Rowe has become the largest independent manufacturer of taps in the UK. With factories in Tamworth, Rainham and Wolverhampton, all Perrin & Rowe products are manufactured here in the UK by a skilled team of engineers.
Renowned for its commitment to quality, design and innovation, Perrin & Rowe is a true British success story. Having built an enviable reputation and a premium portfolio of hand-crafted products, Perrin & Rowe is globally recognised as a market leader and highly respected British manufacturer.

Perrin & Rowe's Promise .....

- Manufactured employing the latest technology and made from low lead brass.
- Plated to a thickness that exceeds the industry standards. This additional plating will ensure a deep protective coating that is resistant to wear and tear as well as being pleasing to the eye.
- Assembled by hand and individually water tested to ensure peace of mind.
- Made to include bearing rings and engineering 'O' seals on handles and spouts to ensure maximum durability. This feature prolongs the life of the tap and ensures a 'wobble free feel'
- Made with ceramic disc valves supplied by the world's leading ceramic cartridge manufacturer. Valves are repeatedly tested up to 500,000 life cycles (turned on and off with pressurised water), this equates to at least 25 years of use in a domestic installation.

The Rinse

Hot, cold or mixed water is diverted to the rinse once the top button is pressed. Perrin & Rowe hand rinses have been designed to cope with even low water pressures; the integration of a patented diverter means that they can be effective with just 1 bar of pressure.

CALLISTO

The **Callisto** straddles both contemporary and classic design and is available with either crosshead or lever handles. This three or four hole tap is designed to be work top mounted usually behind undermount sinks.
This combination results in a most sophisticated arrangement.

Callisto three-hole mixer 'C' spout with crossheads

Ref. 4885 CP Chrome **£440**
Ref. 4885 NI Nickel **£484**
Ref. 4885 PF Pewter **£528**

Callisto three-hole mixer 'C' spout with crossheads and rinse

Ref. 4890 CP Chrome **£579**
Ref. 4890 NI Nickel **£638**

Quarter turn ceramic disc flow control
Single flow spout
360° swivel spout
Spout mounting hole size Ø 35mm
Controls mounting hole size Ø 30mm
Rinse pull-out hose length 60cm

MIMAS

The elegantly sculptured Mimas not only has a beautiful shape it also boasts the latest ceramic disc technology that assures it to be a top performer.

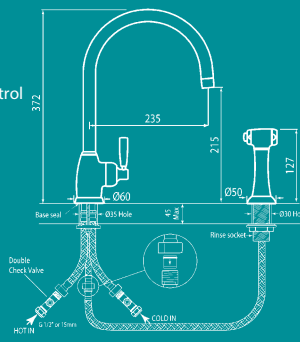
Mimas single lever monobloc mixer with swivel 'C' spout

Ref. 4841 CP Chrome **£318**
Ref. 4841 NI Nickel **£350**
Ref. 4841 PF Pewter **£382**

Mimas single lever monobloc mixer with swivel 'C' spout and rinse

Ref. 4846 CP Chrome **£458**
Ref. 4846 NI Nickel **£504**
Ref. 4846 PF Pewter **£550**

Recommended working pressure
Min 1.0 bar - Max 5.0 bar
Quarter turn ceramic disc flow control
Single flow spout
360° swivel spout
Mounting hole size Ø 35mm
Rinse pull-out hose length 60cm
Rinse mounting hole size Ø 30mm



OBERON

The femininely shaped **Oberon** is a delightful combination of soft curves and is an evolvement of the more minimalist forbears. There are two models to choose from; one with the ever useful pull-out Rinse.

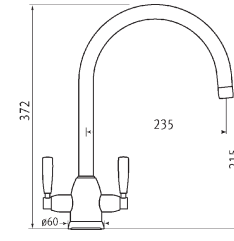
Oberon twin lever monobloc mixer with 'C' spout

Ref. 4861 CP Chrome **£307**
Ref. 4861 NI Nickel **£338**
Ref. 4861 PF Pewter **£369**

Oberon twin lever monobloc mixer with 'C' spout and rinse

Ref. 4866 CP Chrome **£447**
Ref. 4866 NI Nickel **£492**
Ref. 4866 PF Pewter **£536**

Recommended working pressure
Min 1.0 bar Max 5.0 bar
Quarter turn ceramic disc flow control
Single flow spout
360° swivel spout
Mounting hole size Ø 35mm
Rinse mounting hole size Ø 30mm
Rinse pull-out hose length 60cm



The Rinse

Hot, cold or mixed water is diverted from the running tap to the rinse once the handset trigger is pressed.

Perrin & Rowes patented Rinses can cope with low pressure - minimum 1 bar. All handsets are also insulated against hot water.

OASIS

The Art Deco styling of the **Oasis** allows this beautiful tap to be installed in both modern and traditional settings.

Not only will the Oasis be an elegant presence in the kitchen, it is also a superb operator with a super smooth swivel spout and precise quarter turn ceramic disc controls.

Oasis 3-hole mixer

Ref. 4592 CP Chrome **£644**
Ref. 4592 NI Nickel **£708**

COUNTRY RANGE

The **Country Range** taps are a reminder of the flamboyant Baroque period where exuberant styling and extravagant detailing were all the vogue. This collection has bucket loads of presence and are a delight to use - all models have the latest quarter turn CD valves and the spouts swivel silkily from the uppermost junction. This takes away strain from the tap and reduces flex on the sink when the spout is moved.

ALSACE

The **Alsace** an individual component tap which is designed to be fitted directly on to the work surface behind undermounted sinks.

– newform

www.newform.it

Newform are an Italian tap manufacturer that has evolved over the last twenty years into one of Italy's trendiest design leaders. Their state of the art headquarters includes a hi-tech development and testing facility that is responsible for some of the most avant-garde taps available today. As with most Italian tap manufacturers quality and reliability has been placed as it's main goal. This has resulted in a growing excellent reputation in the UK with both the retail and commercial sectors. Newform's products can be found in many of the finest hotels around the world and all taps are backed up by both national and international certificates of quality.

X-T

The **X-T** family, one of the entry level ranges of taps from Newform offering the same uncompromising quality and slick design as their higher priced relatives.

LIBERA

A very smart semi-professional sink mixer from Newform. Typical slick Italian design is at work here with the unique option of chrome, black or white adjustable spring spouts.

The detachable spray-head has a dual-flow option; cascade or needle-spray. The latter is useful for rinsing and food preparation. For those of you who like the minimalist styling but don't want the spring hose there is a standard spout model which is a fine example of less is more.

Libera single lever sink mixer with swivel and adjustable spring. Double-jet flow.

GROHE
ENJOY WATER

www.grohe.co.uk

All Grohe taps are covered by a 5 year parts and labour guarantee for both domestic and commercial use.

At Grohe's life testing laboratories in the Black Forest, all taps are put through their paces and shown no mercy. They endure the simulated effects of 20 years daily use - with especially hard water. The taps often out perform their own international standards in the process - and it shows. Grohe quality goes well beyond an article's normal life cycle and, should a certain product be discontinued, replacement parts remain available for a minimum of ten years.

Grohe are one of Germany's leading tap manufacturers of kitchen taps . We have chosen some of their most popular models from twin lever, single lever and semi-professional mixers and gathered them together over the next eight pages. The kitchen tap is the most used appliance in your home (up to 90 times per day!) this is why Grohe's engineering thoroughness provides years of trouble-free service. See pages 250-251 and 260-261 for Grohe's Blue and Red ranges.

ATRIO

A modern tap with a retro twist best describes the **Atrio** range. It's key feature is the Bauhaus influenced design with stepped detailing and slim body creating a timelessly classic tap.

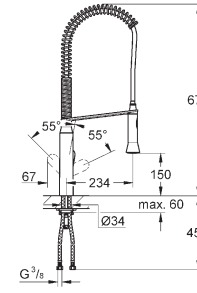
GROHE K7

Professional looks and professional level features; the K7 collection of kitchen taps has it all. A fusion of crisp, architectural styling and practical attributes, K7 will appeal to culinary experts who settle for nothing less than the best. There are four beautifully designed models to choose from all offering very different styles and functions. The flagship model is the 'Professional' which features an arched coil that guides the extractable hose, this combines a cascade with a wide spray, while the control lever featuring GROHE SilkMove technology gives precise control of the water flow and temperature. The Professional mixer spray can be pulled out, turned and swivelled 360º and operated with one hand. Furthermore, you can switch back and forth between the spray and cascade without having to turn off the water. A choice of two surfaces finishes gives the mixers two distinctive looks. GROHE StartLight chrome lends an air of elegant modernity to the design, while SuperSteel embodies the strength and pure luxury of the range.



K7 Professional Sink Mixer

Ref. 32 950 000
Chrome **£814**

Speed Clean
Remove lime scale with a single wipe.

MINTA

The **Minta** family have an understated slender elegance that has ensured them to be one of Grohe's most popular taps both here and in Germany.

There are three taps available; two pull-out versions, one with an aerated flow, one with a needle spray flow and a standard spout model.

The pull-out section maintains the same slender diameter as the spout thus keeping the purity of shape.

MINTA TOUCH

The GROHE **Minta Touch** has so many amazing features. It fights dirt, germs and bacteria being operated by the slightest touch, simply and cleverly with just the back of your hand, wrist or forearm.

Design and function are also perfectly alligned and always with safety in mind. That's because Minta Touch is absolutely safe, with no risk of scalding, as the Easy Touch only works with cold water.

Prefer warm water with your Touch function? Simply upgrade Minta Touch with with Grotherm Micro. This small thermostat underneath your sink gives you your perfect temperature every time, with no risk of scalding.

KWC started producing kitchen and bathroom taps in 1897 and soon became highly successful with their determined pursuit of excellence. They were soon a well known brand all around Europe and their taps were fitted in the Hotel Ritz in Paris in 1911.

Since the early beginnings of the company, innovation has been a major priority at KWC. For instance, with the first pull-out spray that came onto the market in 1957, KWC achieved success with a design that has influenced the world of taps ever since.

Nowadays KWS is found internationally in homes, hotels and professional restaurants. Once you handle and use a KWC tap it 's superior quality becomes very apparent.

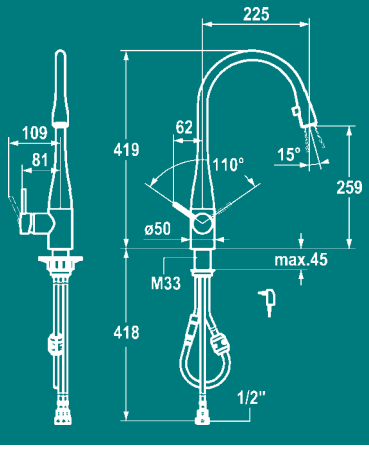
Applicable to Eve with light
Operating voltage 6.75v, cable length 0.8m
Integrated on/off button with automatic shut off after 45 minutes.



KWC eve

The **KWC eve** collection are a shining example of creativity and innovation. The unique combination of the highest quality metals combined with the play of light and water result in a most seductive form. This beautiful tap is available with or without lighting and is made in four finishes:
Solid stainless steel, chrome or a new black chrome and a particularly velvety white which perfectly matches Corian surfaces.

These new finishes now provide greater scope for creative freedom.

KWC zoe

Sculptural, innovative and in a class of its own; **Zoe** brings together all of KWC's expertise in a single tap. The result of this successful synthesis of functional variety, organic design and a fascinating interplay of water and light is a unique, unparalleled masterpiece. From every angle, the KWC Zoe reveals new aspects of its distinctive character and demonstrates what makes it such a ground breaking style icon in the world of tap design.

Zoe single lever monobloc with pull-out spout with LUMINAQUA LED technology

Pull-out hose length 50cm
Mounting hole size Ø 35mm
Fastening - threaded sleeve D33 L45mm

LED light: the LUMINAQUA LED function light can be operated using an ON/OFF membrane button integrated in the pull-out spray. It switches off automatically after 30 minutes.

Two types of jet: it is easy to switch between Neoperl jet and needle spray at the touch of a button.

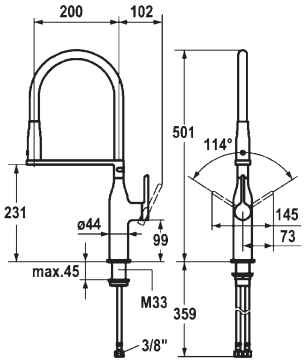
Pull-out spray: the spray, which is integrated flush in the spout, can be pulled out by up to 50 cm.

Turn & Clean and JETCLEAN: easy cleaning of the spray (Turn & Clean) and effective protection against limescale (JETCLEAN) all in one.

Sophisticated lever design: the delicate yet robust lever blends discreetly into the background thanks to its dark colour.

KWC sin

A stunning range of taps that combine elegantly sculptured curves with high precision engineering. The **Sin** consists of two family members - most distinctive is the highflex® semi-professional model which has a unique patented sprung hose that remains in its set working position for the task in hand. While its sister model employs the ever useful pull-out spout that also benefits from a twin-flow mode.



Ref. 10 261 432 000FL

The eye-catching feature of this tap is the extremely flat lever, which is based on an innovative lever principle with an invisible lifting mechanism.

It moves and lifts simultaneously on opening - thus providing a completely new feel to its operation.

Water Pressure
explained - page 135

The semi-professional multi-hole solutions represent a logical expansion to the Highflex range.

The individual positioning of the spring hose, swivel spout and lever mixer is a functional variation that comes into its own, particularly in larger kitchens.

Precise and easy to use filigree lever made from hardened steel

The professional spray on the Highflex can be used while the swivel spout is in use. Pressing lightly on the adjustment lever on the spray head activates the needle spray. As soon as the adjustment lever is released, the water comes out of the swivel spout again.

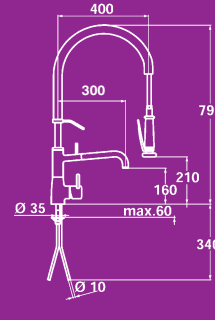
The pre-rinse spray with integrated shock absorber is built for the professional kitchen. Two types of spray can be used - the straight spray for targeted use or the conical spray. Thanks to the new lever lock, the spray is also suitable for one-handed operation.

SYSTEMA

KWC **Systema** is the high performance solution for private households whilst being a design object of timeless elegance. The Systema stands in pride of place in many European homes and its sheer robustness make it a reliable helper in the kitchen for a lifetime.

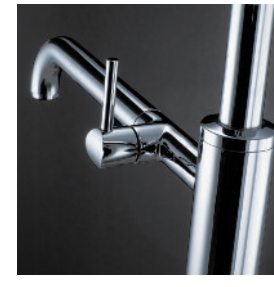
Ref. 10 501 144 000
Systema with pre-rinse spray
Chrome **£1229**

Min. 2.0 bar pressure required
Flow rate at 3 bar:
Neoperl® Cascade 12ltrs per min
Pre-rinse spray 15ltrs per min
Pull-out length 60cm
160° swivel spout
Mounting hole size ø 35mm
10mm copper tails



The support spring provides both flexibility and stability.

Once work is finished the pre-rinse spray is simply and safely secured.



The swivel spout with its own shut-off valve.

LIVELLO

The **Livello's** restrained elegant design will ensure this latest range from KWC as timeless classics. As with all KWC taps the Livello benefits from the highest quality materials and typical precision Swiss workmanship thus ensuring a long and trouble-free life.

Choose between the standard swivel spout or the ever popular pull-out aerator model.

- Please note the handle spec change with stainless steel models.

Practical, ergonomic, beautiful: the lever controls the water flow and allows you to switch from cold to hot in one fluid motion.

The integrated Neoperl Cache is easy to remove using the key supplied - and can be cleaned in no time at all.

The pull-out spout adds 60 cm to the tap's reach and can swivel a full 360° - making it an ideal choice for an island installation.

ONO

KWC **Ono** encapsulates the aesthetic of an elegant and slim tube design: fine and robust yet clear cut and simple, of decidedly superb quality and perfect proportions that are easy on the eye. Just like the design, there are no compromises in the materials and workmanship either. The high quality construction together with sleek mechanics make the Ono range a work of art that is second to none.

The delicate easy to use filigree lever made of hardened steel lend an exceptionally graceful and precise form to this collection of kitchen taps.

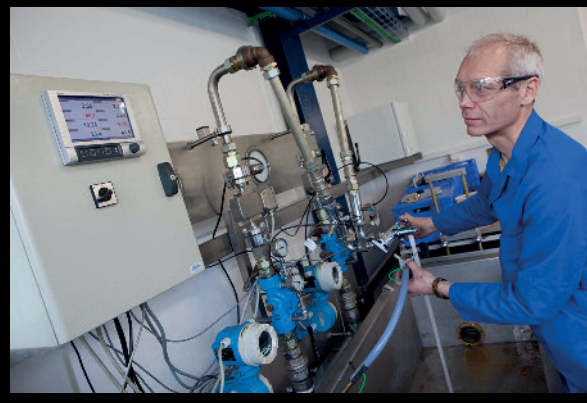
arwa sanimatic SIMILOR KUGLER

WATER INSPIRATION SINCE 1854

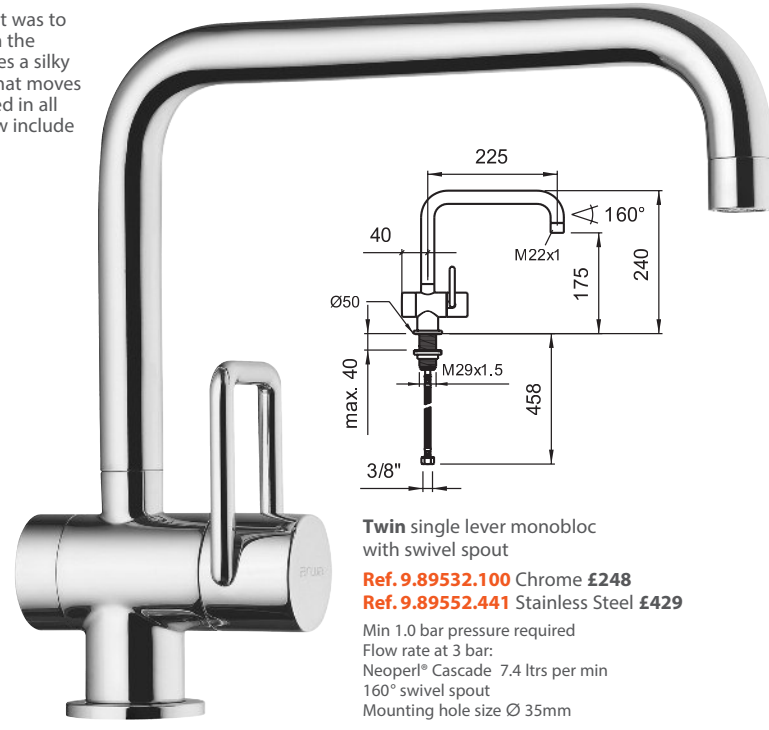
www.similor.ch

Arwa is a brand of the Swiss Similor Kugler Group established in 1854 and have gained a highly respected reputation in Europe for innovative design and uncompromising quality. Their success is reflected by their presence in 45% of Swiss households - no mean feat!
All the taps have been designed with an open dialogue between designers, engineers ensuring enviable designs and unbeatable quality reflected in trouble-free longevity.



TWIN

The **Twin** has been created by close collaboration with renowned designer Winfried Noth.
The design ethos was to create a tap that was to combine timeless pragmatic design with the highest quality components. This includes a silky smooth swivel spout and control lever that moves whilst the cap remains hygienically sealed in all operating positions. The Twin family now include four variants to fulfil most requirements.



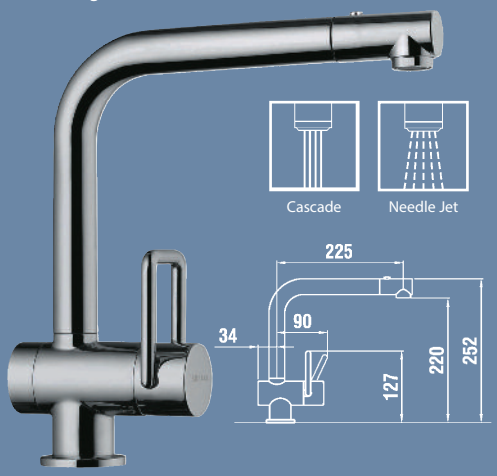
Twin single lever monobloc with swivel spout

Ref. 9.89532.100 Chrome **£248**
Ref. 9.89552.441 Stainless Steel **£429**

Min 1.0 bar pressure required
Flow rate at 3 bar:
Neoperl® Cascade 7.4 ltrs per min
160° swivel spout
Mounting hole size Ø 35mm

TWIN Pull-Out

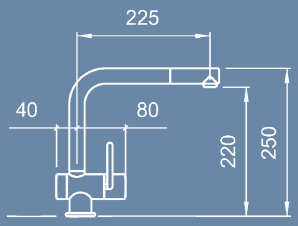
This pull-out spout designs lever may be positioned at the left or right or frontally as preferred. This thoroughly thought out tap even has an extra-lightweight pull-out aerator with an insulated water feed to avoid scolding when using the hot rinse.



Twin single lever monobloc with swivel spout and pull-out rinse with dual-flow mode

Ref. 9.89683.441 Stainless Steel **£598**

Min 2.0 bar pressure required
Flow rate at 3 bar:
Neoperl® Cascade 8 ltrs per min
360° swivel spout Pull-out hose length 60cm
Mounting hole size Ø 35mm



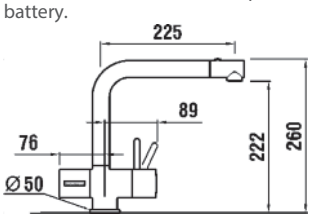
Twin single lever monobloc with swivel spout and pull-out rinse

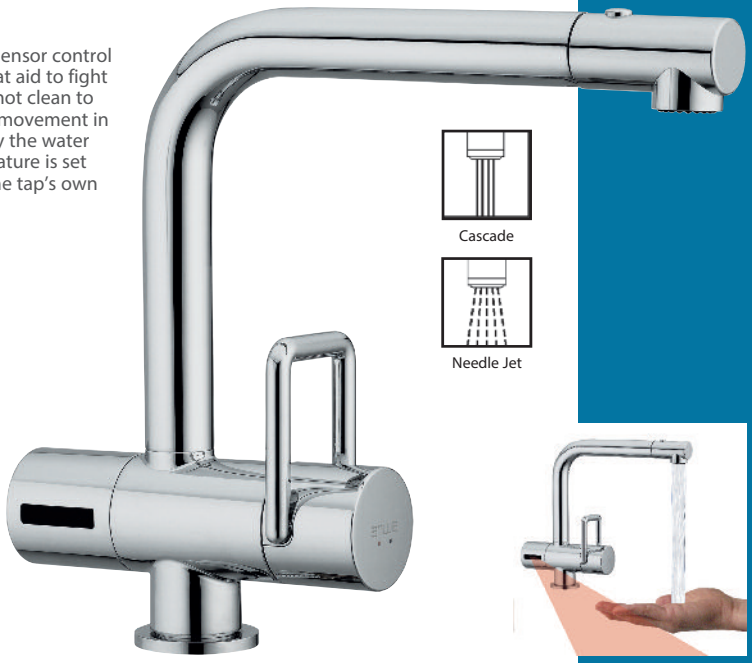
Ref. 9.89673.100 Chrome **£274**

Min 2.0 bar pressure required
Flow rate at 3 bar:
Neoperl® Cascade 8.7 ltrs per min
360° swivel spout
Pull-out hose length 60cm
Mounting hole size Ø 35mm

TWINCHEF

The combination of a standard lever and a sensor control opens up new options in the kitchen. A great aid to fight dirt, germs and bacteria - if your hands are not clean to operate the lever, the water is triggered by movement in front of the IR-sensor. When you move away the water flow automatically stops. The water temperature is set via the lever. The IR-sensor is powered by the tap's own battery.





Twinchef with IR-Sensor single lever monobloc with swivel spout and pull-out rinse with dual-flow mode

Ref. 9.08634.100 Chrome **£926**

Min 2.0 bar pressure required
Flow rate at 3 bar:
Neoperl® Cascade 4.4 -7.8 ltrs per min
360° swivel spout
Pull-out hose length 60cm
Mounting hole size Ø 35mm

TWINFLEX

With its groundbreaking flexible spout system, the Arwa-Twinflex allows the water to be directed exactly where it's needed. The flexible spout can be moved to any position - and stops there. The flexible spout is fashioned from three layers: a synthetic water-bearing hose contained within a flexible metal hose to define the form, which in turn is inserted into a high quality and durable synthetic sheath - this is what gives the Twinflex its attention grabbing looks.

reddot design award winner 2008

COLOURS

Replacement sheaths are available which can be retro fitted if you want to have change of colour.

When ordering add colour suffix.

KARBON

The **Karbon** mixer tap offers total range of motion, putting water exactly where it needs to be - freeing your hands at the kitchen sink.

Designed with multiple, moveable joints, the tap allows you to position and lock the flow exactly where you need it. You can extend the tap fully to fill large pots (giving up to 46cm clearance), lower into the sink for food preparation and cleanup, fold it compactly out of the way when not in use, or position it anywhere in between. The Karbon's five pivoting joints offer limitless flexibility and precise adjustment to height and direction. The sleek joystick can be placed to the left or right of the tap, offering yet another dimension of control.

The Karbon is constructed from a durable combination of brass and carbon fibre.

SENSATE

The touchless kitchen tap frees up your hands so you can speed through prep, cooking and cleaning without spreading germs throughout the kitchen. Response™ technology makes **Sensate** respond to your every move. Simply wave your hand or an object such as a pan or kitchen utensil to turn Sensate on or off. Its state-of-the-art sensor is in tune with your every move, precision-designed to provide reliable operation every time.
So there's no need to worry about false activations when you're working in the sink area.

Sensate Touchless Tap
Single lever pull-out twin function spout

POT FILLERS

The **Pot Filler** is widely used in commercial kitchens and is popular for domestic use in the U.S. We now believe it's time to introduce these useful faucets to the UK. Choose a wall-mounted or a deck-mounted version, the latter being ideal for an island unit or an existing kitchen.

The articulated spout allows total flexibility for direction and reach. The wheel control operates quarter turn valves to deliver cold water directly into saucepans positioned on the stove.

Solid Stainless Steel
Pull-Off Sprays

These traditional British handcrafted stainless steel taps have a unique 'Pull-Off' spray that allows total flexibility for rinsing vegetables or general cleaning. There is a push/pull action on the spout end that controls the flow from an aerated stream to a spray mode.
The spray head has easy clean silicon nozzles and an internal air gap for thermal insulation. A non-return valve is also fitted to the spray head for added safety.

Two flow types.

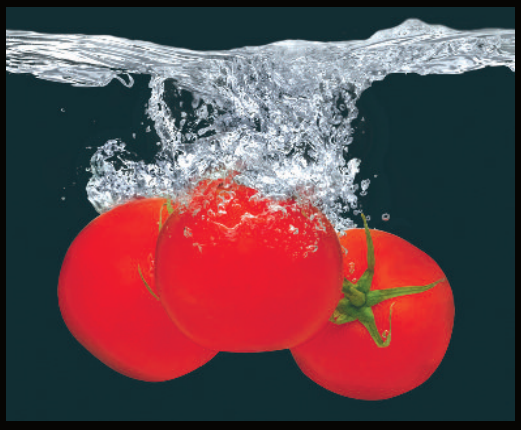
Filtered, Chilled, Sparkling

Instant and convenient

Pages 238 - 252

The filtered water tap is fast becoming a common feature in today's modern kitchen. The high performance filters transform standard tap water into fresh clean tasting drinking water so efficiently that the filtered water can not be distinguished from from bottled mineral water.
The cost saving is considerable compared to purchasing bottled water and also saves time and energy carrying heavy bottles from the supermarket. Using a filtered tap is also environmentally friendly thus avoiding the disposal of endless plastic bottles.



Filtered

Sub-micron filtration brings you crystal clear, great-tasting water for healthier drinks.

Sparkling

Filtered and chilled and sparkling!!
Beautifully refreshing chilled sparkling water on tap.

Chilled

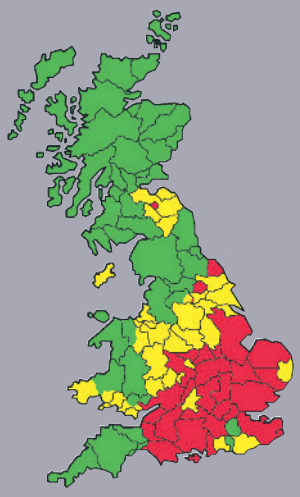
Filtered and chilled!
Beautifully refreshing chilled water on tap.

& Boiling Water Taps

Energy efficient, environmentally friendly

Boiling

Filtered, boiled water on tap for that perfect cup of tea. Instantly!



UK Scale Map

- Hard to Very Hard
- Medium Hardness
- Soft

As well as filtering out chlorine and dissolved metals all our filter taps reduce calcium substantially improving the taste and also prolonging the lives of kettles and steam irons.

Water Pressure
explained - page 135

BOILING WATER TAPS

Once you have one, you'll wonder how you ever did without it. No kettles, no leads, no clutter, no fuss... Just 98° C of steaming hot and cold filtered water at the flick of a lever. With their elegantly sleek lines, Insinkerator models don't just bring style to the kitchen; they bring a level of convenience that fits today's busy lifestyles.

The GN1100, H330 & 3N1 models produces hot filtered water, while the HC1100 & HC300 offers both hot and cold filtered water from the same tap. Both feature an unobtrusive filter system under the sink that reduces chlorine, lead, turbidity and other unpleasant tastes and odours.

They only heat the water you use, making the household more energy efficient. The HC1100 tap with the added cold filtered water feature provides a cost effective alternative to buying bottled water.

The hot water boiler and initial filter are included with the tap.

1100 SERIES

The **1100 series** have a café chic design and will sit discreetly in the kitchen providing an invaluable service.
The GN-1100 provides hot filtered water only while the HC-1100 offers both filtered hot and cold drinking water.

Includes Hot Water and Filter System and safety control on levers.

WRAS Approved

1100 Series Specifications

GROHE RED

Grohe Red is comprised of two elements; a tap and a boiler.
There are a choice of two tap styles: the Red Duo dispenses both mixed (hot/cold) water and boiling water while the smaller Red Mono version exclusively supplies boiling water. The Red Mono is a perfect second tap for kitchens which already have a standard tap.

Child safety took top priority in the design of Grohe Red. Releasing the hot water requires a two-step pull-and-turn movement of the handle - preventing accidental scalding and ensuring safety for households with children. In addition Grohe CoolTouch technology is used to isolate the interior hot water channel from the body and the handles, so they are never too hot to touch.

Grohe Red also scores points on energy and resource efficiency because it avoids the excess water which is inevitably boiled in electric or stove kettles; it instead delivers the precise amount of hot water required helping you to save energy on a daily basis.

The Grohe Duo is a regular kitchen tap dispensing hot and cold and mixed water by operating its right hand lever. Filtered Boiling water is supplied by operating the child-proof control on the left side. This control springs back to off when when the control is released.

Features

- Boiling Filtered water instantly.
- Precise boiling temperature control.
- Superior sub-micron filtration
- Childproof certified handle with a pull and turn closure for boiling water
- Grohe Cool Touch, isolated spout for cool touch - no risk of scalding.
- Economic - uses only 2.1kw of power per day

GROHE BLUE

www.grohe.co.uk

Like a fresh water spring in your kitchen.

Grohe Blue unites a modern designer standard hot and cold mixer tap with a revolutionary high performance filter that reduces the impurities which affect the taste and smell of ordinary tap water. Untainted by the taste of heavy metals, lime and chlorine, water filtered by Grohe blue has the clean refreshing taste that one expects from bottled mineral water.

The faucet features two independent waterways - one for filtered water and the other for unfiltered water. Food-safe PEX hoses ensure that once the water has been filtered it never comes in to contact with anything that may taint its taste.

On the faucet handle, an LED display takes the guesswork out of when to change the water filter. When the filter capacity is lower than 10 percent the light blinks to notify the user.
The professional-level filter lasts up to six months and is capable of filtering up to 500 litres of water. It can also be adjusted to cope with both hard and soft water supplies.

- Light continuous when filter is above 10% capacity.
- Light blinks twice when filter is below 10% capacity
- Light blinks continuously when filter is below 1% capacity

GROHE BLUE 2

Filtered, Chilled Sparkling water straight from your kitchen tap.

Still or sparkling? With Grohe Blue 2 the choice is yours. The latest innovative version of Grohe 2 enables you to draw perfectly prepared filtered water that is chilled to perfection and carbonated - directly from your kitchen faucet.

Grohe 2 ensures there's great tasting, refreshing cooled water to suit everybody's taste buds, be it semi-sparkling or fully carbonated. And as there is no need to carry heavy bottles of mineral water back from the supermarket it's kind to the environment too.

Bringing variety and convenience to the kitchen, Grohe Blue 2 unites a modern designer faucet with a revolutionary high performance filter plus a chiller and carboniser. The three step handle is effortless to use and features a coloured LED display to show the level of carbonation selected.

BRITA

The 3-Way mixer & Filter taps shown on these pages prove that combined Filter taps need not be expensive. Brita have made great efforts to offer a collection of high quality Filter taps at a price that is very affordable without any compromise on quality.

Now you can enjoy the great taste of BRITA filtered water straight from the tap. Thanks to the unique BRITA cartridge fitted under the sink, the new range of BRITA water filter taps can give you an unlimited supply of great tasting water, instantly reducing hardness, chlorine and impurities.

Each cartridge delivers 500 litres of filtered water at a fraction of the cost of bottled water - with a big saving on plastic, too.

Selecting the carbonate hardness setting - the filter head can be set to meet varying levels of water hardness. A litmus test kit is supplied for this purpose. When the cartridge is due for replacement a warning buzzer sounds.

Replacement Cartridges
Ref. P1000 £59

TECHNICAL FEATURES

P 1000 water filter cartridge for better taste and limescale reduction.
The professional filter head allows two settings: '+' setting for hard water and '++' for very hard water.
Lifetime is 3 to 6 months depending on your selected setting for water hardness.
Electronic cartridge exchange indicator with display and removable batteries.
Convenient wall mount which ensures a quick and easy cartridge exchange.

Water Pressure
explained - page 135

Filtered water is supplied through it's own waterway so the water is never tainted with unfiltered water.

Three-way mixer & Filtered water taps

www.brita.co.uk

The **Brita** three-way taps have high performance filters that reduce the impurities that effect the taste and smell of ordinary water. Untainted by the taste of heavy metals, lime and chlorine the end results in a clean refreshing taste that competes with superior bottled water.

The taps feature two independent waterways - one for filtered water and the other for unfiltered water so that the filtered water's taste is never tainted.

See the difference between unfiltered and filtered water leaving tea tasting so much better.

Compact cartridge fits easily under the sink.

Bathroom
Taps & Showers

Pages 254 - 265

All our taps have WRAS approved cartridges and anti-splash aerators fitted as standard. All models have a thicker than normal coating of chrome plating to ensure a pristine long lasting finish.

Our thermostatic showers are all TMV2 approved and fitted with highest quality WRAS approved valves.

We offer seven ranges of taps which we believe cover most requirements, including a smart energy saving model. Whichever tap or shower you choose, you can be assured of the highest quality fitting that will provide many years of faithful service.

All our products are backed up by replacement parts in the unlikely event of any problems.

Don't forget that a ten year warranty is always there for your peace of mind.

LINFA

Newform's new **Linfa** is an innovative range of taps with highly eco-friendly and money saving features. Quality and design are superb and the colour choices really add to the Linfa's unique qualities.

LP Min 0.5 bar pressure required

Colour choices - finishes other than chrome to order, please allow 4 weeks delivery.

The Linfa uses an innovative energy saving cartridge. This means the lever when central only dispenses cold water not mixed as others taps do. This prevents firing the water heater each time you turn on the tap.

On average a basin mixer supplies from 9 to 12 litres per minute. Inside the Linfa package there is a water flow reduction aerator. Using it instead of the one installed on the mixer, you can reduce the supply to 5 litres/min for ideal water saving ensuring at the same time a very good aerated flow.
