

A log cabin opens up a world of opportunities for you and your family. Whether you need a home office, an extra bedroom, a gym or just a traditional garden summerhouse, a cabin provides a real way of creating extra living space.

Our range of high quality log cabins have all been designed with these multiple uses in mind. A comprehensive choice of building sizes, shapes and finishes and with prices starting at just £1,249, there's a model to suit everyone.

precision engineered from sustainable timber

The timber we use is from only slow grown Nordic spruce which is evident in the tight growth rings seen on the logs. FSC certification of the timber used ensures sustainability and longevity of supply.

Our log cabin range is available in three log thicknesses – 28mm, 34mm and 44mm, with double glazing being standard on all 44mm cabins.

The precision engineered logs are machined with chalet cut corners, a joint with a 6 sided profile which provides maximum resilience and stability against the UK's wind and rain. The logs are manufactured from kiln dried timber, a process which extracts moisture to an exact level. This method of drying minimises the risk of splitting and reduces warping to an absolute minimum.

The roofs and floors in all our cabins are constructed from kiln dried tongue and groove boards.

Adjustable door hinges, mortised locking door mechanisms and attractive roof shingles come as standard on all models, with opening windows available on most, check specific models for further details.
