

maia[®]

innovation in worksurface technology

maia*...designed for living

maia* designer worksurfaces are both stylish and durable, representing a truly innovative solid surface alternative to the high cost and inherent drawbacks of natural stone.

With six new colours inspired by the very latest in kitchen designs, all **maia** work surfaces are highly heat resistant, impenetrable to dust, dirt and bacteria and are very easy to clean. Available in a variety of modular options, there is no limit to the flexibility of **maia's** comprehensive worksurface range.

A silky smooth finish and seamless joints make **maia's** worksurfaces a luxurious addition to your home. Supplied in a wide range of décors to suit every design, coupled with a 10 year manufacturer's warranty, **maia's** worksurface solution is at the forefront of the UK market.

maia*...enjoy our six **NEW** colours

A	B	C

A. maia 28mm Sandstone worksurface
B. maia Galaxy worksurface
C. maia Calcite worksurface

maia...stylish and durable

the complete solution for your solid surface needs

The **maia** range comprises a new 28mm thick worksurface, as well as the existing and very popular 42mm and 54mm thicknesses. Available with square or curved corners, **maia** gives you flexibility and choice to include in your unique kitchen design.

maia is also designed to make fitting your worksurface as quick and easy as possible. All surfaces are completely factory finished and we've now added 3.6m long sink modules to reduce the number of joints that you may need.

The innovation doesn't stop there. **maia** has introduced a new flush fit sink module as an even more affordable option. Like all of our sink options, we supply the sink, the clips, the waste kit and even the silicon. No jig is required therefore enabling fitting to be simple and fuss free.

A. maia Cristallo worksurface with 1.5 sink module
B. maia Vanilla worksurface, soft to the touch and hygienic too
C. maia Galaxy worksurface with super large sink module

maia*...easy fit installation

The **maia*** easy to fit system makes installation simple, and allows you to create worksurfaces to fit your own design requirements.

Surfaces can be readily installed using standard wood working equipment and they are supplied pre-edged*. All this means that there is no need for expensive and time consuming templating usually associated with solid surface products. *see diagrams on page 22/23 for full details.

Jointing and edging made easy

Jointing kit instructions and easy to apply edging make **maia** easy to install. Our unique jointing system can be used by kitchen fitters with conventional woodworking tools to achieve the seamless joint and edge for the complete 'solid look'.

Installation, care and maintenance manual

maia's installation, care and maintenance manual provides all the information needed to fit and care for your **maia** worksurface. Manuals are supplied, free of charge, to every customer upon purchasing a **maia** worksurface, and include instructions on cutting, jointing and edging, as well as fitting upstands, splashbacks, décor panels and sink modules.

The manual features a comprehensive guide to general cleaning and stain removal, plus full warranty information. All elements of the manual are covered in the **maia** installation DVD.

Works Service

Sometimes you need out of the ordinary worktops specially configured for your kitchen plan. Our Works Service offers you factory manufactured bespoke worktop designs delivered to your door.

maia*...sink modules

maia* has a range of undermounted sink modules which are sold as part of a specially fabricated 1.8m or 3.6m worktop with the sink centrally positioned.

Our sink modules come complete with **maia** stainless steel sinks in a brushed finish with an attractive 25mm radius. Each is also supplied with the necessary sink waste fittings and pipework - all you have to do is add the tap.

Sink bowl modules are available in a 600mm depth with a choice of **maia** sinks. Choose from single bowl, super large bowl or bowl and a half and our new entry level flush mount single bowl and bowl and a half sink modules.

The designer bowl and a half option is supplied in a 650mm depth module with either left or right hand main bowl.

Which ever option you choose, your **maia** undermount sink will bring a bespoke feel to your kitchen and be as practical as it is good looking.

maia®...finishing touches

The **maia®** range includes a collection of accessories and finishing touches to help create the perfect kitchen. In addition to the products featured here, **maia** offers a full range of installation materials and accessories see page 22/23 for more details.

maia's finishing touches include:

Full length splashback...for a contemporary, streamlined look in your kitchen simply add a splashback instead of tiling.

Taps...specially selected taps to complement the rest of the **maia** range. Contour, Curve, Geometry, Mix and Flow are high specification taps whose performance matches their excellent looks.

Hob splashback...for the hardworking area behind the hob or for smaller applications this compact sheet could be the perfect solution.

Upstand...an upstand creates a simple, clean look in your kitchen and is easily combined with splashbacks where used.

Decorative support panels...available in all décors with either 45mm or 100mm depth. These help to create a framed look to your kitchen or are perfect for breakfast bar supports.

Plinth...co-ordinating plinths are available to complete the look.

Hot rods...a set of six stainless steel effect worktop protector rods with self-adhesive backing for simple fitting.

Chopping board...maia's chopping boards are available to blend in or contrast with your worksurface.

A	B
---	---

A. maia Vanilla worksurface and island unit
B. maia Meteorite worksurface with matching 150mm upstand

Ammonite

Ammonite is a dark grey with silver and brown metallic particles. Developed to look stunning with contemporary white and grey kitchens, and also a modern twist on a more traditional look to work with light and medium oaks.

Calcite

Delivering a fresher look than Vanilla, Calcite contains light grey particles suspended in a creamy white background. Works well with light and medium oaks as well as black. A youthful take on a traditional classic.

Fossil

Particles of silver and pearl combine in Fossil to bring a stunning new colour that will work with the majority of kitchen colours and designs.

Meteorite

Gorgeous browns and olives combine with copper metallic particles to deliver luxurious warmth. Not as stark as black, Meteorite works well with cream, white and light coloured woods.

Pearlstone

Bright and crisp with the look of stone, Pearlstone is a pearl white colour with clear granular particles. Works well with truffle, taupe, blacks and browns.

Sandstone

Bringing natural warmth, Sandstone will complement both light and dark coloured kitchens.

Cappuccino

Cappuccino is a stylish choice to complement woods and plain doors. Add dark doors, cream and brown for a relaxed feel, or vibrant zebrano doors to make an impact.

Cristallo

Cristallo is a crisp, solid white with contrasting grey granules. Perfect with silver doors for a modern, industrial feel, or with walnut for classic style.

Galaxy

Galaxy's metallic flecks bring sparkle to your worktop - metallic particles catch the light and complement the deep black background.

Iceberg

Iceberg's beauty lies in its purity. White has become a strong trend for worksurfaces - team with matching doors for a simple, calm style, or with splashes of colour to make a statement.

Latte

Latte is another 'natural neutral' in the maia range. Lighter than Mocha but with deeper tones than maia's original coffee décor, Cappuccino, Latte has quickly become a popular choice.

Lava

Lava is grey with small speckles of brown to create a natural stone effect. Stunning in a blue kitchen with glass, wood and white accessories, or stylishly industrial with glossy black or metallic doors.

Mocha

Mocha brings a deep brown to the maia range. As neutral door colours such as latte and cream grow in popularity, so Mocha really comes into its own.

Vanilla

Vanilla is an elegant colour which complements many kitchen designs. Its coloured flecks make it the perfect match for a range of door colours. Contrast with black for added drama.

Vulcano

Vulcano is the most popular colour in the maia range. Its sophisticated black background is interspersed with contrasting white flecks and subtle hints of yellow.

maia®...Works Service

sometimes you need out of the ordinary worktops specially configured for your kitchen plan

For some time now the **maia®** range has delivered high quality worktop solutions but on occasions the standard **maia** products do not cover everyone's requirements. **maia's** 'Works Service' offers you access to **maia** products specially configured for your kitchen design drawing using a combination of hi tech machinery and hand finishing. Ask your kitchen designer for more details.

maia®
Works Service

maia*...creative freedom and durability

maia* products are all factory edged and finished with crisp, square edges.

In addition to the standard range, **maia** also offers worktops with a curve at each end and breakfast bar islands with a curve at all corners. These curved products have radiused ends to match the growing trend for curved kitchen doors to create a softer look. The 240mm radius on **maia's** curved products complements the majority of new style kitchen doors.

maia's 54mm worksurface specification is perfect if you're looking for a chunkier style whilst for a sleek look the 28mm thickness offers a different effect altogether. These options also follow the modular concept, just like the original 42mm size, making kitchens simple to plan and design.

28mm, 42mm & 54mm worktops are available in all décors and sizes, and with any of the sink modules in the **maia** range.

maia*...designed for living, designed for life!

maia* solid surfaces come with a ten-year guarantee*, and are supported by the FIRA Gold Award for product excellence – this is testimony to the fact we only use the most superior materials, and our products are constantly tested to ensure they are manufactured to the highest possible standards. *Guarantee covers manufacturing, not installation.

maia has been developed to be used in the domestic environment – particularly the kitchen. Although no ‘special’ maintenance is needed we recommend the following is adhered to, as prevention is always better than cure.

Routine cleaning

maia does not require any specialist cleaning regimes - most dirt and light residue will easily wipe away with a damp cloth and soapy water. The worksurface should then be rinsed with clean water and wiped dry. Persistent marks can be removed by using a mild-abrasive cleaner, but harsh scouring powders should be avoided. If in doubt, consult our care and maintenance guide.

Heat

maia’s surfaces will withstand heat better than many alternative surface materials. However, all hot pots, pans and other heat generating devices should always be placed upon a trivet or worktop protector rods, to prevent extreme heat having prolonged and direct contact with the surface. Boiling water and cooking splashes do not harm the surface.

Staining

maia, unlike marble and granite, will resist most household chemicals including alcohol and cosmetics however, some chemicals and strong dyes can cause damage and discolouration. If spillage occurs wipe off immediately and rinse area thoroughly.

Minor scratching

Kitchen utensils and crockery (particularly the unglazed bases) can sometimes cause scratches that will be particularly evident on darker colours. The surface can be damaged by scratching or cutting with knives, so the use of a cutting board is essential. Don’t worry though, any minor scratches can easily be removed using a Scotch-Brite™ pad and other items from the Care Kit. Please refer to the care and maintenance guide.

maia Care Kit

To help maintain your **maia** worksurface, a Care Kit is available from your retailer. This kit contains all that you need to make minor repairs to the surface and a special cleaner that helps to maintain, protect and build up a lustre particularly on darker colours.

Our commitment to customer service

When you choose **maia** you can be safe in the knowledge that you are getting a proven, reliable product; a product that is truly at the forefront of worksurface technology.

Our customer care department is on hand to offer you help, support and advice all year round call **01773 521 300**.
