Wood Column Casings

Preformed wood casings are lightweight in comparison to alternative materials, yet are extremely strong. Once finished with a hard wearing surface such as a laminate, the column casings will require minimal maintenance and will stand the test of time.

The perfect solution for Designers and Installers who are looking for a ready-made, pre-finished solution for covering columns which is quick and simple to install and consistent in quality of finish and appearance.

Metal Column Casings

The Pendock range of metal casings is supplied as a complete system, (including an integral carrier system, joint infills and mullions). It has been designed to offer specifiers and clients alike a product that is unsurpassed in terms of quality, finish, shape and design options. Due to its metal construction, it can be treated as a non-combustible building element and the majority of finishes achieve Class O spread of flame.

The opportunities to create more complex shapes and designs are almost limitless. Our technical team can explore these possibilities with you in detail.

GRP Column Casings

Pendock offer a standard range of circular GRP column casings as well as a range of specials. In addition to these ranges our skilled craftsmen, can also produce bespoke items in almost any shape or size, with high levels of detail.

The standard finish for GRP is white, however columns can be produced in any BS or RAL colour, to ensure that they fully comply with the design.

GRP is a long life / low maintenance product and is particularly suited to hostile environments such as coastal areas. It is also very lightweight and easy to install.

GRG Column Casings

Pendock GRG column casings are non-combustible (Class O), strong and aesthetically pleasing. Ideal for where site conditions allow for a wet fix system, the product itself is very quick and simple to install.

GRG column casings offer an alternative to pre-finished columns, suitable for use in a wide range of applications including commercial buildings, hotels, retail interiors, in both new build and refurbishment situations.

Bespoke Column Casing

Our standard ranges consist of both circular and square casings, although the opportunities to create more complex shapes and designs are almost limitless.

Our project managers and design team will be happy to explore these possibilities with you in detail. We will be delighted to discuss any concepts that you may have for column casings whatever shape, size or finish you may be considering.
